Abstract =>

The Movie Review And Rating System is the System Which can help the user to get the correct rating about the movie along with the reviews on that particular movie,so this application will be the web application where the actions performed by the user will be thorough dynamic in nature,so the technologies used to create this application are wide some of them are:

HTML5,CSS3,JAVASCRIPT,MongoDB,NodeJS,Yelpcamp etc.

So each technology listed here works differently and have a different contribution for the creation for the application.HTML5 is used for giving the content to the webpage eg. Text,images,videos,audios,buttons. CSS3 is used for the presentation of that Content using various properties and values, Javascript is used for making the site responsive called as dynamic in nature,MongoDB and NodeJS will be the Backend of the application where MongoDB is the NOSql Database and Nodejs is the famous js library or framework for creating the backend environment.

Introduction =>

Problem Statement=>

The Movie Review And Rating System is the System Which can help the user to get the correct

rating about the movie along with the reviews on that particular movie,so this application will be the web application where the actions performed by the user will be thorough dynamic in nature,so the technologies used to create this application are wide some of them are:

HTML5,CSS3,JAVASCRIPT,MongoDB,NodeJS,Yelpcamp etc.

So each technology listed here works differently and have a different contribution for the creation for the application.

HTML5 is used for giving the content to the webpage eg. Text,images,videos,audios,buttons. CSS3 is used for the presentation of that Content using various properties and values, Javascript is used for making the site responsive called as dynamic in nature,MongoDB and NodeJS will be the Backend of the application where MongoDB is the NOSql Database and Nodejs is the famous js library or

framework for creating the backend environment.

This is a helpful web application for the people who wants to quickly check for the tutorials along with the comments and the ratings that the movie got from the users.

There will be a search bar for the movies to find and that makes it easier for the user to search for their favourite movies and the trailers.

The rating of the movie completely depends on what the visitors are providing, so if they found the movie useful then they will give that movie the good stars and it will definitely help other users when they want to take the views about the movie and trailers.

the movies that are available will be old and new, there will be the continuous update of the system based on the urls and databases.

The web application is the most flexible form of the applications as compared to the other types of applications because the browser can easily run almost all of them and they are easy in terms of development as compared to the other applications, so working with the web applications is very

friendly and exciting.

Proposed System =>

In this System, we have different new things and Functionalities , which comes in handy
By using it, we have a new interactive Interface which is a user friendly , it is so simple to
Use in real time and we have added new navbars which comes by using a new Bootstrap
4.1.3 version, and this provides a user with a much better experience and along with that
A new javascript is being used as a brand new modificatiob to the system .
We have made this application as much interactive as we can make it, which makes it
Very powerful and brand new movies are also updated to the server so that, if any guy
Is using this in 2020 than he can also find it working if that guy is searchig for new movies
That it will be helpful as new movies are regularly being updated directly through the server
So with that in mind we know that this application is not going to die never.
Now we have to cover that if any existing system is available their than why the people
Are going to use my system, here's the fact, the most popular web application now
On the internet is IMDB which is the famous thing to see the rating of a movie
But as everyone knows that its not that fancy to work with and most of the people are
Interested in fancy things weather is only the UI and believe that user Interface plays the
Important role in creating the audience , my movie Buzz is better than the imdb web app
In terms of UI, here on my web app you will find the most interactive UI that you have
Never seen anywhere for the movie rating system, and along with the that the famous
Web app for movie rating i.e IMDB doesn't shows the new and the better recommandation.

Existing System =>

The existing system gives the idea that how our system is different from the pre existing Systems. So the pre-existing system is not that good in terms of the UI of the application But our system is a lot better in that means.

Now most of the existing systems uses the backend technologies like PHP,

For making the connection to the server.But we used the latest cutting edge

Technology for doing this task, i.e the nodejs framework i.e Expess. Express is

The best framework out there for doing the stuffs.

The Existing systems relies heavily on the Bootstrap but with the older versions.

Because at that time their was the old Bootstrap and the old bootstrap comes with the

Old components and css styles.

But we have used the latest version of Bootstrap i.e the Bootstrap v4.0.3.

Which is the game changer for most of the times.

And most the older web applications of movie rating system used the older versions of ECMA script better known as Javascript, but we are using the latest ES10 which is Released in 2019. And the new es10 comes with the methods and things.

Existing systems comes with a very less functionalities such as they can’t show the Recommandations of the movies that are rocking the world and the most viewed top Charts, and our system works best in all the corners to fulfil the requirement.

Implementation=>

    <h2>Die Hard returning to theaters for 30th anniversary</h2>
    <p class="date">October 25, 2018</p>
    <br>
    <p class="desc">It’s getting close to the most wonderful time of year, so what better way
 to celebrate than to watch the perfect Christmas movie on a big screen?
Fans can debate forever whether or not Die Hard actually
 counts as a “Christmas movie” per se, but the fact is the iconic Bruce
Willis action film turns 30 this year.
 Fathom Events and Turner Classic Movies are
celebrating the big anniversary by bringing Die Hard back to theaters this November.</p>

    <!-- <p class="desc">
  Die Hard is set to be the next installment in the
 TCM Big Screen Classics series from Fathom Events
and Turner Classic Movies. The action movie will return to
 theaters for two days only, Nov. 11 and Nov. 14,
 featuring new pre and post-film commentary by
TCM host Ben Mankiewicz. It’s a great opportunity for
 Brooklyn Nine-Nine fans to finally figure out what all those references are about.

    <h2>Guillermo del Toro Directing ‘Pinocchio’ for Netflix</h2>
    <p class="date">October 22, 2018 </p>
```

Fresh off his Oscar win for “The Shape of Water,” Guillermo del Toro is set
to make his animated feature film directing debut.
Del Toro has received the green light from Netflix to
film “Pinocchio,” a stop motion musical
version of the classic children’s tale about a puppet who wants to be a real live boy.
He will write and produce the film in addition to directing it.

<!--
The film will be set in Italy during the 1930s, a particularly fraught historical moment
and a time when fascism was on the rise and Benito Mussolini was
consolidating control of the country. Production on “Pinocchio” will begin this fall.
Del Toro previously set “The Devil’s Backbone” and “Pan’s Labyrinth”
against a totalitarian backdrop, although he placed those stories in Franco’s Spain.

<h2>‘Wonder Woman 1984’ Pushed Back Seven Months to 2020</h2>
October 21, 2018

Jeff Goldstein, Warner Bros.’ president of domestic distribution, said,
“We had tremendous success releasing the first ‘Wonder Woman’ film during the summer
so when we saw an opportunity to take advantage of the changing competitive landscape,
we did. This move lands the film exactly where it belongs.”

<!--
“Wonder Woman 1984” is the eighth
installment in the DC Universe,
and the fourth movie featuring
Gadot’s Wonder Woman.
The first pic earned $821.8
million worldwide, including
$412.6 million in North America.
The movie is the
highest-grossing film with a female director,
as well as the
25th-highest-grossing
movie of all time in North America.
Patty Jenkins
is returning to direct.
The film was originally dated on Dec. 13,

```
      2019, but was moved forward to Nov.
       1 to avoid being just a single week ahead of Disney-Lucasfilm's
       "Star Wars: Episode IX," which opens
        on Dec. 20, 2019. Chris Pine is also
       back and Kristen Wiig
        joins as the villainous Cheetah.
         Gadot and Jenkins are producing along
          with Charles Roven,
          Deborah Snyder, Zack Snyder
           and Stephen Jones.

  <h1>Guillermo del Toro Directing &#8217;Pinocchio&#8217; for Netflix</h1>

  <p class="date">October 22, 2018</p>

  <img
src="https://www.syfy.com/sites/syfy/files/syfywire_blog_post/2018/10/guillermo_del_toro_double_

oscars_hero.jpg" class="sizeimg">

  <br><br><br>
```

Fresh off his Oscar win for ’The Shape of Water,’ Guillermo del Toro is set to make his animated feature film directing debut. Del Toro has received the green light from Netflix to film ’Pinocchio,’ a stop motion musical version of the classic children’s tale about a puppet who wants to be a real live boy. He will write and produce the film in addition to directing it.

The film will be set in Italy during the 1930s, a particularly fraught historical moment and a time when fascism was on the rise and Benito Mussolini was consolidating control of the country. Production on ’Pinocchio’ will begin this fall. Del Toro previously set ’The Devil’s Backbone’ and ’Pan’s Labyrinth’ against a totalitarian backdrop, although he placed those stories in Franco’s Spain.

’No art form has influenced my life and my work more than animation and no single character in history has had as deep of a personal connection to me as Pinocchio,’ said del Toro in a statement. ’In our story, Pinocchio is an innocent soul with an uncaring father who gets lost in a world he cannot comprehend. He embarks on an extraordinary journey that leaves him with a deep understanding of his father and the real world. I’ve wanted to make this movie for as long as I can remember.’

Del Toro previously collaborated with Netflix on its Emmy award-winning television series ’Trollhunters,’ the first installment of the DreamWorks’ Tales of Arcadia trilogy. The next chapter, ’3Below,’ is set to debut on in December and it will be followed by

’Wizards’ in 2019. He created the upcoming Netflix horror anthology series, ’Guillermo del Toro Presents 10 After Midnight.’ Del Toro’s other credits include ’Crimson Peak’ and ’Pan’s Labyrinth.’

The project comes as Netflix is investing heavily in children’s entertainment a move that will be increasingly important as Disney prepares to launch its own streaming service. To that end, the company has backed the likes of ’Lemony Snicket’s A Series of Unfortunate Events,’ along with upcoming series such as ’She-Ra and the Princesses of Power’ and ’Gabby’s Dollhouse.’

Del Toro will collaborate on ’Pinocchio’ with the Jim Henson Company, the company behind ’The Dark Crystal’ and ShadowMachine, the creator of ’Bojack Horseman.’ Lisa Henson, ShadowMachine’s Alex Bulkley, Corey Campodonico, and Gary Ungar of Exile Entertainment will produce the film. Blanca Lista will co-produce it.

Patrick McHale (’Over The Garden Wall’) will co-write the script, and Mark Gustafson (’Fantastic Mr. Fox’) will co-direct the movie. Guy Davis will serve as co-production designer and the film’s puppets will be built by Mackinnon and Saunders, the team behind ’Corpse Bride.’

’Throughout his distinguished career, Guillermo has exhibited mastery in inspiring people through his magical worlds filled with unforgettable and magnificent characters, from the monsters in ’Pan’s Labyrinth’ to the aquatic beast in ’The Shape of Water,’ Melissa Cobb, VP of kids and family at Netflix, said in a statement. ’We are incredibly excited to expand our relationship with Guillermo and we know that his deeply touching vision for bringing Pinocchio to life on Netflix will be embraced by audiences the world over.’

  <h1>Die Hard returning to theaters for 30th anniversary</h1>

  <p class="date">October 25, 2018</p>

  <img src="https://www.tynesidecinema.co.uk/storage/app/uploads/public/59f/c06/ae2/59fc06ae29b2

f658747393.jpg" class="sizeimg">

  <br><br><br>
```

Its getting close to the most wonderful time of year, so what better way to celebrate than to watch the perfect Christmas movie on a big screen? Fans can debate forever whether or not Die Hard actually counts as a “Christmas movie” per se, but the fact is the iconic Bruce Willis action film turns 30 this year. Fathom Events and Turner Classic Movies are celebrating the big anniversary by bringing Die Hard back to theaters this November.

Die Hard is set to be the next installment in the TCM Big Screen Classics series from Fathom Events and Turner Classic Movies. The action movie will return to theaters for two days only, Nov. 11 and Nov. 14, featuring new pre and post-film commentary by TCM host Ben Mankiewicz. Its a great opportunity for Brooklyn Nine-Nine fans to finally figure out what all those references are about.

Directed by John McTiernan, Die Hard centers on a battle of wits between wise-cracking cop John McClane (Willis) and the perfectly-named terrorist Hans Gruber (Alan Rickman). After Gruber and his goons take over the 35-story L.A. high-rise where McClanes estranged wife works, the cop finds himself the only thing standing in the way of their villainous master plan.

Hilariously, all this action takes place at Christmastime, with the holiday being the whole reason McClane is in the same vicinity as his wife when her business is attacked. As EW’s James Hibberd wrote in 2015, ’that set-up is a standard holiday movie formula. The fact that it’s terrorists stalling John McClane instead of a blizzard in Chicago (Planes, Trains and Automobiles), or his time-sucking corporate job (Jingle All the Way), is just Die Hard’s way of making its protagonist’s obstacles more interesting.’

  <h1>Wonder Woman 1984 Pushed Back Seven Months to 2020</h1>

  <p class="date">October 22, 2018</p>

  <img src="https://www.awn.com/sites/default/files/styles/original/public/image/featured/1036044-director-patty-jenkins-returning-wonder-woman-sequel.jpg?itok=7ZmQjVPP" class="sizeimg">

  <br><br><br>

  <p class="desc">

    Jeff Goldstein, Warner Bros.&#8217; president of domestic distribution, said, &#8217;We had tremendous success releasing the first &#8217;Wonder Woman&#8217; film during the summer so when we saw an
```

opportunity to take advantage of the changing competitive landscape, we did. This move lands the film exactly where it belongs.’

’Wonder Woman 1984’ is the eighth installment in the DC Universe, and the fourth movie featuring Gadot’s Wonder Woman. The first pic earned $821.8 million worldwide, including $412.6 million in North America. The movie is the highest-grossing film with a female director, as well as the 25th-highest-grossing movie of all time in North America.

Patty Jenkins is returning to direct. The film was originally dated on Dec. 13, 2019, but was moved forward to Nov. 1 to avoid being just a single week ahead of Disney-Lucasfilm’s ’Star Wars: Episode IX,’ which opens on Dec. 20, 2019. Chris Pine is also back and Kristen Wiig joins as the villainous Cheetah. Gadot and Jenkins are producing along with Charles Roven, Deborah Snyder, Zack Snyder and Stephen Jones.

Warner Bros. bought the rights to ’Six Billion Dollar Man’ late last year from the Weinstein Company, which had been developing the movie with Damian Szifron — best known for directing the Argentinian drama ’Wild Tales.’ The studio had already pushed back the release date for the sci-fi action film by a year, moving the opening from May 31, 2019, to June 5, 2020, in the wake of Szifron departing as director in early May of this year.

’Wonder Woman 1984’ is currently the only film dated for June 5, 2020. Gadot made the announcement Monday on her Twitter account.

Conclusions/Future Enhancements=>

This is a movie rating web application, which was developed using a lot of technologies,
We call it as the Stack, we used MongoDB as a Database, and Html,CSS,JS Express
A nodejs Framework.So, we have successfully Created a Web Applications which tells us
The Rating of all the movies that are created so far.The movie rating system is very important
As a s/w because the people who watch the movies so often, are always curious about knowing
About the Ratings of a particular Movie.But having a good interface for the user is
The very Important thing in the web application, so our application is a lot better than the
Other applications which are of a similar kind.And its quiet efficient as well in terms of
The running time, because of the server side language and the server that we have used in
Making this web application.
The future enhancement based on this Application is basically the new movies that comes
And got released,So by the contineous Updation of the server based on the movies that are
Releasing is important in terms of the Future Enhancements.So that any movie that exists
On planet must be their if someone is searching for that movie in our application.
