Master of Arts in Applied Psychology
Mid Term Examination - Nov 2023

Duration : 90 Minutes
Max Marks : 50

Sem I - K1PM103T - Life Span development

General Instructions

Answer to the specific question asked

Draw neat, labelled diagrams wherever necessary

Approved data hand books are allowed subject to verification by the Invigilator

- 1) Explain the role of language in cognitive development. K2 (2)
- 2) Define the nature and perspectives of lifespan development. Provide examples in support of your answer. K1 (3)
- 3) Discuss the concept of schemas, assimilation, and accommodation in Piaget cognitive theory and how they relate to cognitive development. K2 (4)
- 4) Discuss longitudinal design, and how it contributes to our understanding of development over time. K2 (6)
- 5) Illustrate the importance of experimental design in advancing our understanding of human development. K3 (6)
- 6) Determine the significance of naturalistic observation in studying human behavior and development in natural settings. K3 (9)
- 7) Conclude the strength and limitations of Erikson's theory of psychosocial development in detail. K4 (8)
- 8) Analyze the ways in which children develop their understanding of moral reasoning and the concept of right and wrong, as per Piaget. K4 (12)

OR

Outline the ecological systems theory as proposed by Urie Bronfenbrenner. How does this perspective explain the impact of various environmental systems on an individual's development? Provide examples to illustrate each level of the ecological systems. K4 (12)
