

School of Nursing

(ANNUAL PROGRAM)

Program: BSC NURSING

Syllabus as approved by Indian nursing council. New Delhi

Scheme:2019-2023

Date of BoS:3rd June 2019

Curriculum

1st year

Sl.	Course	N. C.I. C.					Assessment Pattern			
No	Code	Name of the Course	L	T	P	C	IA	MTE	ETE	
1	BSCN1001	ANATOMY AND PHYSIOLOGY	4	0	0	4	15	5+5	75	
2	BSCN1002	NUTRITION AND BIOCHEMISTRY	3	0	0	3	15	5+5	75	
3	BSCN1003	NURSING FOUNDATIONS (THEORY)	9	0	7	16	15	5+5	75

BSC NURSING 1ST YEAR

Name of The Course	Anatomy & Physiology
Course Code	BSCN1001
Prerequisite	10+2 with PCB 55%
Corequisite	Anatomy physiology lab with models, charts, log book, Group projects, Video
	film, Anatomy & Physiology Atlas.
Antirequisite	NA
	L T P C
	4 0 0 4

Course Objectives:

- 1. To enable students to acquire knowledge of normal structure of human body system
- 2. To enable students to acquire knowledge of normal functions of each body system
- 3. To identify any deviations from normal to abnormal
- 4. To apply knowledge of anatomy and physiology to treat disease conditions in hospital settings.

Course Outcomes

CO1	Describe anatomical terminology, organization of human body, structure of cell & tissues
	and its implications in nursing.
CO2	Explain & demonstrate normal structure (Anatomy) of various human body systems.
CO3	Explain & demonstrate normal functions (physiology) of various human body systems
CO4	Identify and demonstrate the alteration in anatomical structures in diseases and practice of
	nursing.
CO5	Identify and demonstrate the alteration in physiological parameters in diseases and practice
	of nursing.

Text Book (s)

- 1. Cohen Memmler's Structure & Function of Human Body, 2009, LWW.
- 2. Waugh Ross & Wilson Anatomy & Physiology, 2008, Elsevier.
- 3. Tortora Anatomy & Physiology, 2007, Wiley

Reference Book (s)

- 1. Chaurasia Human Anatomy, 2005, CBS Publishers
- 2. Standring Gray's Anatomy, 2006, Elsevier
- 3. Snell Clinical Anatomy by Regions, WK.

Course Content:

Unit-1 Introduction to Anatomical terms organization of the human body and Cell Physiology 5 + 4 Hours

Anatomy

Human Cell structure. Tissues – Definition, Types, characteristics, classification, location, functions & formation. Membranes and glands – classification and structure

Physiology

Cell Physiology. Tissue formation, repair. Membranes & glands – functions

Alterations in disease .Applications and implications in nursing

Unit-2 The Skeletal System 6+4 Hours

Anatomy

Bones – types, structure, Axial & Appendicular Skeleton, Bone formation and growth, Description of bones, Joints classification and structure

Physiology

Bone formation & growth. Bones – Functions and movements of bones of axial and appendicular skeleton, bone healing, Joints and joint movement

Alterations in disease. Applications and implications in nursing

Unit-3 The Muscular System

7+4 Hours

Anatomy

Types and structure of muscles, Muscle groups

Physiology

Muscle movements, Muscle tone, Physiology of muscle contraction, levels and maintenance of posture, Alterations in disease, Applications and implications in nursing

Unit-4 The nervous System

6+7 Hours

Anatomy

Structure of neurologia & neurons, Somatic Nervous system, Structure of brain, spinal cord, cranial nerves, spinal nerves, peripheral nerves

Autonomic Nervous System – Sympathetic, parasympathetic, Structure, location

Physiology

Functions of Neurolgia & neurons, Stimulus & nerve-impulse- definitions and mechanism,

Functions of brain, spinal cord, cranial and spinal nerves

Cerebrospinal fluid-composition, circulation and function Reflex arc, Reflex action and reflexes, Automatic functions –Pain: somatic, visceral and referred, Automatic learning and biofeedback

Alterations in disease, Applications and implications in nursing

Unit-5 The Sensory Organs

6+4 Hours

Anatomy

Structure of skin, eye, ear, nose tongue, (Auditory and olfactory apparatus)

Physiology

Functions of skin, eye, ear, nose, tongue, Alterations in disease, Applications and implications in nursing

Unit -6 Circulatory and lymphatic system

7+8 Hours

Anatomy

The Circulatory System: Blood – Microsoft structure, Structure of Heart, Structure of blood vessels- Arterial & Venous System, Circulation: Systemic, pulmonary, coronary, Lymphatic System, Lymphatic vessels & lymph, Lymphatic tissues: Thymus gland, Lymph nodes, Spleen, Lymphatic tissues

Physiology

Blood formation, composition, blood groups, blood coagulation, Hemoglobin: Structure, Synthesis and breakdown, Variation of molecules, estimation, Functions of Heart, Conduction, Cardiac cycle, circulation-Principles, Control, factors influencing BP and Pulse, Alterations in disease, Applications and implications in nursing

Unit -7 The Respiratory System

5+6 Hours

Anatomy

Structure of the organs of respiration, Muscles of respiration: Intercostals and Diap Hoursagm

Physiology

Functions of respiratory organs, Physiology of respiration, Pulmonary ventilation, Volume

, Mechanics of respiration, Gaseous exchange in lungs, Carriage of oxygen & carbon-dioxide, Exchange of gases in tissues, Regulation of respiration

Alterations in disease, Applications and implications in nursing

Unit – 8 The Digestive System

6+6 Hours

Anatomy: structure of Alimentary tract and accessory organs of digestion **Physiology**

Functions of organs of digestive tract. Movements of alimentary tract, Digestion in mouth, stomach, small intestines, Large intestines, Absorption of food. Functions of liver, gall bladder and pancreas. Metabolism of carbohydrates, protein and fat.

Unit – 9 The Excretory system (Urinary)

4+5 Hours

Anatomy

Structure of organs of urinary System: Kidney, Ureters, urinary, bladder, uret Hoursa, structure of skin. **Physiology**

Functions of kidneys, ureters, urinary bladder & uret Hoursa. Composition of urine. Mechanism of urine formation. Functions of skin. Regulation of body temperature. Fluid and electrolyte balance

Unit -10 The Endocrine system

4+5 Hours

Anatomy

Structure of Pituitary, Pancreas, thyroid, Parathyroid, thymus and adrenal glands

Physiology

Functions of Pituitary, pineal body, thymus, Thyroid, parathyroid, pancreas, Suprarenal, Placenta and ovaries & Testes

Unit – 11 Reproductive System including breast

4+5 Hours

Anatomy

Structure of female reproductive organs, Structure of male reproductive organs, Structure of breast, Alterations in disease.

Physiology

Reproduction of cells – DNA, Mitosis, Meiosis, spermatogenesis, oogenesis. Functions of female reproductive organs; Functions breast, Female sexual cycle. Introduction to embryology. Functions of male reproductive organs, Male function in reproduction, Male fertility system. Alterations in disease. Applications and implications in nursing.

Unit – 12 The Lymphatic and immunological system

2 Hours

Circulation of lymph. Immunity. Formation of T-cells and B cells. Types of Immune response. Antigens. Cytokines. Antibodies

Internal Assessment (IA)	Mid Term Exam (MTE)	End Term Exam (ETE)	Total Marks
15	5+5	75	100

Name of The Course	NUTRITION &BIOCHEMISTRY
Course Code	BSCN1002
Prerequisite	10+2 with PCB 55%
Corequisite	Nutrition &Biochemistry lab, charts, log book, Group projects, Video film, Cooking, preservation of food
Antirequisite	NA
	L T P C
	3 0 0 3

- 1. To enable students to acquire knowledge of the classification, functions, sources and recommended daily allowances of food in health and disease conditions.
- 2. TO enable students to acquire knowledge in metabolism of Fat, Carbohydrates and Proteins.
- 3. Describe the classification, functions, sources and recommended daily allowances (RDA) of Fats, carbohydrates, proteins, and water. (N)
- 4. To assist the students to acquire knowledge of the normal biochemical composition and functioning of human body and understand the alterations in biochemistry in diseases for practice of nursing. (B)
- 5. To apply knowledge of nutrition and biochemistry to treat disease conditions in hospital settings.

Course Outcomes

CO1	(N) Describe relationship between health and nutrition
	(B) Describe structure, composition and functions of cell and its membranes; differentiate
	between prokaryote and eukaryote cells.
CO2	(N) Describe classification, functions, sources and recommended daily allowances (RDA) of
	carbohydrates, fats, proteins, vitamins, minerals, water and electrolytes.
	(B) Explain the composition and metabolism of carbohydrates, lipids, amino acids and
	proteins, vitamins and minerals.
CO3	(N) Describe balanced diet, cookery rules and preservation of nutrients, plan and prepare
	therapeutics diets and balanced diet for different age groups and disease conditions.
	(B) Describe immunochemistry and role of nurse to correct the immune system of people.
CO4	((N) Describe the role of nurse in various National nutritional programs, assessment of
	nutritional status of vulnerable group and nutritional education.
CO5	(N) Identify and recognize any deviation/nutritional deficiencies in different age groups/sick
	individuals and take corrective measures.

Text Book (s)

- 1. Nutrition and Biochemistry for Nurses ,2nd Edition Authors: Venkatraman S Hourseemathy Sucheta P Dandekar ,Paperback ISBN: 9788131235850 ,eBook ISBN: 9788131240205 Imprint: Elsevier Published Date: 20th May 2015
- 2. Text book of Biochemistry for Nurses, year: 2011

Reference Book (s)

- 1. Medical Biochemistry for nurses as per INC, DR. SHWETA SINGH, Kumar publisher
- 2. Nutrition and health for nurses, by AK JAIN, Anchal publishing co
- 3. Biochemistry & Nutrition for B.Sc. Nursing, Textbook by Manjula Shantaram.

Unit-1 Describe the relationship between nutrition & Health (N) Introduction To Biochemistry (B)

4+3 Hours

Nutrition: History, Concept, Role of nutrition in maintaining health, Nutritional problems in India, National nutritional policy, Factors affecting food and nutrition: socio-economic, cultural, tradition, production, system of distribution, life style and food habits etc. Role of food and its medicinal value, Classification of foods, Food standards, Elements of nutrition: macro and micro Calorie, BMR.

Biochemistry: Definition and significance in nursing, Review of structure, Composition and functions of cell Prokaryote and Eukaryote, cell organization, Microscopy.

Unit-2 Carbohydrates(N) Cell membrane (B)

2+6 Hours

Nutrition: Classification, Calorie Value, Recommended daily allowances, Dietary sources, Functions, Digestion, absorption and storage, metabolism of Carbohydrates.

Biochemistry: Structure and functions of Cell membrane: Fluid mosaic model tight junction, Cytoskeleton, Transport mechanism: diffusion osmosis, filtration, active channel, sodium pump, Acid base balance-maintenance & diagnostic tests, Ph buffers.

Unit-3 FATS (N) metabolism of Carbohydrates (B)

2+6 Hours

Nutrition: Fats: Classification, Caloric value, Recommended daily allowances, Dietary sources, Functions, Digestion absorption and storage, metabolism, Malnutrition: Deficiencies and over consumption.

Biochemistry: Composition and metabolism of Carbohydrates: Types, structure, composition and uses: Monosaccharide, Disaccharides, Polysaccharides Oligosaccharides, Metabolis: Pathways of glucose: Glycolysis, Gluconeogenesis: Cori's cycle, Tricarboxylic acid (TCA) cycle, Glycogenolysis: Pentose phosphate, Pathways (Hexose monophosphate) Regulation of blood glucose level, Investigations and their interpretation.

Unit-4 Vitamins(N) metabolism of Lipids (B)

2+4 Hours

Nutrition: Vitamins: Classification, Recommended daily allowances, Dietary sources, Functions Absorption, synthesis, metabolism storage and, excretion, Deficiencies, Hyperminosis.

Biochemistry: Composition and metabolism of Lipids (B): Nomenclature, Roles and Prostaglandins, Metabolism of fatty acid Breakdown, Synthesis, Metabolism of triacylglycerols, Cholesterol metabolism:, Biosynthesis and its Regulation Bile salts and bilirubin, Vitamin D, Steroid hormones. Lipoproteins and their functions: VLDLs- IDLs, LDLs and HDLs Transport of lipids Atherosclerosis, Investigations and their interpretations

Unit-5 Daily calorie requirement for different categories of people(N) Composition and metabolism of Amino acids and Proteins (B)

3+6 Hours

Nutrition: Energy: Unit of Energy – Kcal Energy requirements of different categories of people, Measurements of energy ,Body Mass Index (BMI) and basic metabolism, Basal Metabolic Rate (BMR) - determination and factors affecting BMR.

Biochemistry: Composition and metabolism of Amino acids and Proteins, Types, structure, composition and uses of Amino acids and Proteins, Metabolism of Amino acids and Proteins ,Protein synthesis, targeting and Glycosylation, C Hoursomatography, Electrophoresis Sequencing, Metabolism of Nitrogen ,Fixation and Assimilation, Urea Cycle,

Hemes and chlorophylls, Enzymes and co-enzymes; Classification, Properties, Kinetics and inhibition, Control, Investigations and their interpretations.

Unit-6 Vitamins (N) 4+2 Hours

Composition of Vitamins and minerals(B)

Nutrition: Vitamins: Classification, Recommended daily allowance, Dietary sources, Functions: Absorption, synthesis, metabolism, storage and excretion, Deficiencies Hypervitaminosis.

Biochemistry: Composition of Vitamins and minerals, Vitamins and minerals: Structure, Classification, Properties, Absorption, Storage & transportation, Normal Concentration, Investigations and their interpretation.

Unit-7 Minerals (N) 4+3 Hours

Nutrition: Classification ,Recommended daily allowances, Dietary sources, Functions, Absorption, synthesis, metabolism storage and excretion, Deficiencies, Over consumption and toxicity

Biochemistry: Immune response, structure & classification of Immunoglobulin's, Mechanism of antibody production, Antigens- HLA typing, Free radical & antioxidants, Specialized proteins- collagen, elastin, keratin, myosin, lens protein, Elecrophoretic & quantitative determination of immunoglobulin's- ELISA. Etc., Investigations & their interpretation.

Unit-8 Sources, functions and requirements of water & electrolytes (N) 3 Hours

Water & electrolytes: Water: Daily requirement, regulation of water metabolism, and distribution of body water, Electrolytes: Types, sources, composition of body fluids, Maintenance of fluid & electrolyte balance, Over hydration, dehydration and water intoxication, electrolyte imbalances.

Unit-9 Cookery rules and preservation of nutrients (N)

5 Hours

* Principles, methods of cooking and serving, ,Preservation of nutrients ,,Safe Food handling-toxicity, Storage of food, Food preservation, food additives and its principles, prevention of food adulteration Act (PFA), Food standards, Preparation of simple beverages and different types of food.

Unit-10 Balanced diet ((N)

7 Hours

Balanced diet: Elements, Food groups, Recommended Daily allowance, Nutritive value of foods, Calculation of balanced diet for different categories of people, Planning menu, Budgeting of food, Introduction to therapeutic diets: Naturopathy – diet.

Unit-11 Role of nurse in nutritional programmes (N)

4 Hours

National programmes related to nutrition: Vitamin A deficiency programme, National iodine deficiency disorders (IDD) programme, Mid-day meal programme, Integrated child development scheme (ICDS), National and International agencies working towards food/nutrition, NIPCCD, CARE, FAO, NIN, CFTRI (Central food technology and research institute) etc., Assessment of nutritional status, Nutrition education and role of nurse

Internal Assessment (IA)	Mid Term Exam (MTE)	End Term Exam (ETE)	Total Marks
15	5+5	75	100

Name of The Course	Nursing Foundations
Course Code	BSCN1003
Prerequisite	10+2 PCB 55%
Corequisite	Demonstration, Group projects, Video film, charts
Antirequisite	NA
	L T P C
	9 0 7 16

This course is designed to help the students to develop and understanding of the philosophy, objectives, theories and process of nursing in various supervised clinical settings. It is aimed at helping the students to acquire knowledge, understandings and skills & techniques of nursing and practice them in supervised clinical settings

COURSE OUTCOME

CO1	Describe the concept of health, illness and health care agencies
CO2	Explain the concept of nursing & scope of nursing profession and also describe values, code of
	ethics and professional contacts for nurses in India.
CO3	Demonstrate and perform various basic nursing procedures to provide safe and quality patient care
	by using nursing process and accurate documentation/ reporting
CO4	Develop effective communication.
CO5	Demonstrate, perform and document health assessment of each human body system.
CO6	Identify various machinery, equipments used in patient care and their maintenance.
CO7	Describe principle and technique for infection control measures and BMW management in clinical settings.
C08	Describe principles, routes, effects of administration of medicine and injections.
CO9	Demonstrate peri operative patient care and surgical asepsis
CO10	Describe the basics physiological and psychological needs of patients. Demonstrate the principles
	and techniques for meeting needs of patients.
CO11	Explain and demonstrate the care of the terminally ill patient and dying patients

Text Book (s)

- 1. Taylor Fundamentals of Nursing, 2007, LWW
- 2. Kozier Fundamentals of Nursing, 2007, Pearson
- 3. Potter Basic Nursing, 2008, Elsevier

Reference Book (s)

- 1. 1 Lynn Taylor's Clinical Nursing Skills,2008,LWW
- 2. Craven Fundamentals of Nursing, 2010,LWW
- 3. LWW Lippincott's Nursing Procedure, 2008, LWW.
- 3. Jacob Clinical Nursing Skills & Procedures, 2008, Jaypee

Course Content:

Unit-1 Introduction	10 Hours

Concept of Health: Health – Illness continuum, Factors influencing health, Causes and risk factors for developing illness, Body defenses: Immunity and immunization, Illness and illness Behavior: Impact of illness on patient and family, Health Care Services: Health Promotion and prevention and Primary Care, Diagnosis, Treatment, Rehabilitation and Continuing Care, Health care teams, Types of health care agencies, Hospitals: Types, Organization Functions, Health Promotion and Levels of Disease Prevention, Primary health care and its delivery: Role of nurse.

Unit-2 Nursing as a profession

16 Hours

Definition and Characteristics of a profession, Nursing: Definition, Concepts, philosophy, objectives, Characteristics, nature and scope of nursing practice, Functions of nurse, Qualities of a nurse - Categories of nursing personnel, Nursing as a Profession, History of Nursing in India, Values: Definition, Types, Values, Clarification and values in professional Nursing: Caring and Advocacy

Ethics: Definition and Ethical Principles, Code of ethics and professional conduct for nurses.

Unit-3 Hospital admission and discharge

4 Hours

Admission to the hospital, Unit and its preparation admission bed, Admission procedure Special considerations, Medico-legissues Roles and Responsibilities of the nurse, Discharge from the hospital

- Types: Planned discharge, LAMA and abscond, Referrals and transfers, Discharge Planning, Discharge procedure, Specia considerations, Medico--legal issues, Roles and Responsibilities of the nurse, Care of the unit after discharge.

Unit-4 Communication & Nurse patient relationship

10 Hours

Communication: Levels, Elements, Types, Modes, Process, Factors influencing Communication- Methods of Effective Communication,- Attending skills, Rapport building skills, Empathy skills, Barriers to effective communication, Helping Relationships (NPR): Dimensions of Helping Relationships, Phases of a helping relationship, • Communicating effectively with patient, families and team members and maintain effective human relations with special reference to communicating with vulnerable group(children, women, physically and mentally challenged and elderly) • Patient Teaching: Importance, Purposes, Process, role of nurse and Integrating teaching in nursing process.

Unit-5 The Nursing Process

15 Hours

Critical Thinking and Nursing Judgment Critical Thinking: Thinking and Learning, o Competencies, Attitudes for Critical Thinking, Levels of critical thinking in Nursing

• Nursing Process Overview: Application in Practice o Nursing process format: INC, current format o Assessment Collection of Data: Types, Sources, Methods - Formulating Nursing judgment: Data interpretation of Nursing diagnosis - Identification of client problems - Nursing diagnosis statement and Difference between medical and nursing diagnosis, o Planning, Implementation, Evaluation of patient care, Documentation & reporting.

UNIT-6 Documentation and Reporting

4 Hours

• Documentation: Purposes of Recording and reporting • Communication within the Health Care Team, • Types of records; ward records, medical/nursing records, • Common Record-keeping forms, Computerized documentation • Guidelines for Reporting: Factual Basis, Accuracy, Completeness, currentness, Organization, confidentiality • Methods of Recording, • Reporting: Change-of shift reports: Transfer reports, Incident reports • Minimizing legal Liability t Hoursough effective record keeping.

UNIT-7 Vital Signs

15 Hours

Importance, Guidelines for taking vital signs: Body temperature: Physiology, Regulation, Factors affecting body temperature, Assessment of body temperature: sites, equipments and technique, special considerations Temperature alterations: Heatstroke, Hypothermia Hot and cold applications, Pulse Physiology and Regulation, Characteristics of th pulse, Factors affecting pulse Assessment of pulse: sites, location, equipments and technique, special considerations, Alterations in pulse: Respiration: Physiology and Regulation, Mechanics of breathing, Characteristics of the respiration

Factors affecting respiration. Assessment of respirations: technique, special considerations, Alterations in respiration Blood pressure: Physiology and Regulation, Characteristics of the blood pressure, Factors affecting blood pressureAssessment of blood pressure: sites, equipments and technique, special considerationsAlterations in blood pressure, Recording of vital signs.

UNIT-8 Health Assessment

30 Hours

Purposes, Process of Health assessment- Health history, Physical examination: Methods- inspection, Palpation, Percussion, Auscultation, Olfaction. General assessment, Assessment of each body System Recording of health assessment.

UNIT-9 Machinery, equipments & linen

5 Hours

Types: Disposables and re-usable- Linen, rubber goods, glass ware, metal, plastics, furniture, machinery Introduction: - Indent - Maintenance - Inventory.

UNIT-10 Meeting needs of patient

60 Hours

Basic needs (Activities of daily living) Providing safe and clean environment: - Physical -environment: Temperature, Humidity, Noise, Ventilation, light, Odour, pests control - Reduction of Physical hazards: fire, accidents - Safety devices: Restraints, side rails, airways, trapez etc - Role of nurse in providing safe and clean environment Hygiene: - Factors Influencing Hygienic Practice - Hygienic care: Care of the Skin-Bath and pressure points, feet and nail, Oral cavity, Hair Care, Eyes, Ears, and Nose

• Assessment, Principles, Types, Equipments, Procedure, Special Considerations - Patient environment: Room Equipment and linen, • Making patient beds Types of beds and bed making Comfort: - - Factors Influencing Comfort - Comfort devices Physiological needs: -Sleep and Rest: - Physiology of sleep - Factors affecting sleep - Promoting Rest and sleep, Sleep Disorders Nutrition: - - Importance - Factors affecting nutritional - Assessment of nutritional needs: Variables - Meeting Nutritional needs: Principles, equipments, procedure and special considerations -Oral -Enteral: Naso/ Orogastric, gastrostomy - Parenteral: - Urinary Elimination - Review of Physiology of Urine Elimination, Composition and characteristics of urine Factors Influencing Urination Alteration in Urinary Elimination Types and Collection of urine specimen: Observation, urine testing Facilitating urine elimination: assessment, types, equipments, procedures and special considerations - Providing urinal / bed pan o Condom drainage o Perineal care o Catheterization o Care of urinary drainage o Care of urinary diversions o Bladder irrigation f Bowel Elimination -Review of Physiology of Bowel Elimination, Composition and characteristics of faeces - Factors affecting Bowel elimination - Alteration in Bowel Elimination - Types and Collection of specimen of faeces: Observation -Facilitating bowel elimination: assessment, equipments, procedures and special considerations Passing of Flatus tube Enemas Suppository Sitz bath Bowel wash Care of Ostomies Mobility and Immobility - Principles of Body Mechanics - Maintenance of normal body dignment and mobility - Factors affecting body Alignment and mobility -Hazards associated with immobility - Alteration in body Alignment and mobility - Nursing interventions for impaired Body Alignment and Mobility: assessment, types, devices used, method and special considerations, rehabilitation aspects Range of motion exercises o Maintaining body alignment: Positions Moving Lifting Transferring Walking Restraints - Oxygenation - Review of Cardiovascular and respiratory Physiology - Factors Affecting Oxygenation -Alterations in oxygenation - Nursing interventions in oxygenation: assessment, types, equipment used, procedure and special considerations Maintenance of patent airway Oxygen administration Suction Inhalations: dry and moist Chest physiotherapy and postural drainage. Care of Chest drainage Pulse oxirnetry CPR- Basic life support Fluid, Electrolyte, and Acid — Base Balances - Review of Physiological Regulation of Fluid, Electrolyte, and Acid -Base Balances - Factors Affecting Fluid, Electrolyte, and Acid - Base Balances - Alterations in Fluid, Electrolyte, and Acid - Base Balances Nursing interventions in Fluid, Electrolyte, and Acid - Base imbalances: assessment, types, equipment, procedure and special considerations o Measuring fluid intake and output Correcting Fluid, Electrolyte Imbalance: Replacement of fluids: Oral and Parenteral Venipuncture, regulating IV Flow rates, changing IV solutions and tubing, Changing IV dressing, Administering Blood transfusion Restriction of fluids Psychosocial Needs Concepts of Cultural Diversity, Stress and Adaptation, Self-concept, Sexuality, Spiritual Health, Coping with loss, death and grieving Assessment of psychosocial needs - Nursing intervention for psychosocial needs - Assist with coping and adaptation - Creating therapeutic environment o Recreational and diversional therapies.

UNIT-11 Infection control in clinical settings

20 Hours

Infection control Nature of infection Chain of infection transmission Defenses against infection: natural and acquired Hospital acquired infection (Nosocomial infection) • Concept of asepsis: medical asepsis, and surgical asepsis Isolation precautions (Barrier nursing): - Hand washing: simple, hand antisepsis and surgical antisepsis (scrub) - Isolation: source and protective - Personal protecting equipments: types, uses and technique of wearing and removing - Decontamination of equipment and unit - Transportation of infected patients - Standard safety precautions (Universal precautions) - Transmission based precautions • Biomedical waste management: - Importance - Types of hospital waste - Hazards associated with hospital waste - Decontamination of hospital waste - Segregation and Transportation and disposal of hospital waste.

UNIT-12 Administration of medication

40 Hours

General principles, consideration, purposes of medication, rights of the patients. Safety in administering medication. Medications and Mediation Errors; Drug Forms; Routes of administration Storage and maintenance of drug, Broad classification of drugs:- Therapeutic Effect, Side Effects, Toxic Effects, Idiosyncratic Reactions, Allergic Reactions, Drug Tolerance, Drug Interactions,

- Factors Influencing drug Actions, - Systems of Drug Measurement: Metric System, Apothecary System, Household Measurements, Solutions. Converting Measurements Units: Conversion within one system, Conversion between systems, Dosage Calculation, Terminologies and abbreviations used in prescriptions of medications Oral Drugs Administration: Ora Sub-lingual and Buccal: Equipment, procedure, Parenteral- General principles: decontamination and disposal of syringes a needles

Types of parenteral therapies, Types of syringes, needles, canula, and infusion sets, Protection from Needle stick Injuries: Giving Medications with a safety syringes, Routes of parenteral therapies

Intra-dermal: purpose, site, equipment, procedure, special considerations, Subcutaneous: purpose, site, equipment, procedure special considerations, Intra Venous: purpose, site, equipment, procedure, special considerations, Intra Venous: purpose, site, equipment, procedure, special considerations and Nurses responsibility.- Advanced techniques: epidural, intra-thecal, intra-osseous, intra-peritoneal, intra-plural, intra-arterial-Role of nurse, Topical Administration: purposes, site, equipment, procedure, special considerations for Application to Skin Application to mucous membrane- Direct application of liquids-Gargle and swabbing the t Hoursoat- Insertion of Drug into body cavity: Suppository, medicated packing in rectum/vagina- Instillations:, Ear, Eye, Nasal, Bladder, and Rectal- Irrigations: Eye, Ear,

Bladder, Vaginal and Rectal- Spraying: Nose and t Hoursoat Inhalation: Nasal, oral, endotracheal (steam, oxygen and medications) purposes, types, equipment, procedure, special considerations

- Recording and reporting of medications administered.

UNIT-13 Meeting needs of Peri-operative patients

10 Hours

Definition and concept of Peri operative Nursing, Preoperative Phase- Preparation of patient for surgery Intra-operative, Operation theatre Set up and environment., Role of nurse, Postoperative Phase, Recovery unit Post operative unit, Postoperative care, Wounds: types, Classifications, wound Healing Process, Factors affecting Wound, Complications of Wound Surgical asepsis, Care of the wound: types, equipments, procedure and special considerations-Dressings, Suture Care,- Care of Drainage- Application of Bandages,

Binders, Splints & Slingss- Heat and Cold Therapy and Healing.

UNIT-14 Meeting special needs of patient

15 Hours

Care of patients having alteration in: - Temperature (hyper and hypothermia); Types, Assessment, Managemen Sensorium (Unconsciousness); Assessment, Management - Urinary Elimination (retention and incontinence); Assessment Management - Functioning of sensory organs: (Visual &hearing impairment) - Assessment of Self-Care ability Communication Methods and special considerations - Mobility (physically challenged, cast), assessment of Self-Care ability: Communication Methods and special considerations - Mental state (mentally challenged), assessment of Self-Care ability; - Communication Methods and special considerations - Respiration (distress); Types, Assessment, Management Comfort - (Pain) - Nature, Factors influencing Pain, Coping, Assessment, Management; Treatment related gastrointestinal system: nasogastric suction, gastric irrigation, gastric - analysis

UNIT-15 Care of Terminally ill patient

5 Hours

Concepts of Loss, Grief, grieving Process - Signs of clinical death - Care of dying patient: special considerations - Advar directives: euthanasia, will, dying declaration, organ donation etc - Medico-legal issues - Care of dead body: equipme procedure and care of unit - Autopsy – Embalming.

UNIT-16 Pi	rofessional Nursing concepts and practices	5 Hours

Conceptual and theoretical models of nursing practice: Introduction to models- holistic model, health belief model, hea promotion model etc Introduction to Theories in Nursing; Peplau's, Henderson's, Orem's, Neuman's, Roger's and Roy Linking theories with nursing process.

This course is designed to assist the students to acquire knowledge of fundamentals of psychology and develop an insight into behaviour of self and others. Further it is aimed at helping them to practice the principles of mental hygiene for promoting mental health in nursing practice.

Course Outcomes

CO1	
	Describe the history, scope, methods and biology of Human behavior.
CO2	Describe and identify cognitive processes and role of nurse in managing altered cognitive processes.
CO2	Describe the Medication and another language and their inflamences.
CO3	Describe the Motivation and emotional processes and their influence on behaviour
CO4	
	Explain the concepts of personality and its influence on behavior.
CO5	Describe psychology of people during developmental phase of life and identify ego defense mechanism and its implication on mental health.
CO6	
	Illustrate role of nurse in psychological assessment and testing.

Text Book (s)1.

- R Sreevani Psychology for Nurses, 2012, Jaypee Brothers Medical Publishers.
- 2. Basavanthappa BT- Psychology for Nursing, 2010, Jaypee Brothers Medical Publishers.
- 3 A.B Salgado –Introductory Psychology for Nursing and Allied Health Sciences, 2010, Jaypee Brothers Medical Publishers

Reference Book (s) 1. Mark Breedlove – Principles of Psychology, 2005, Oxford University Press.

- 2. I Clement Textbook on Psychology, 2016, Jaypee.
- 3. Madhavi & pratibha A Textbook of Psychology, 2015, Vijayam Publications.

Course Content:

Unit-1 Introduction	2 Hours
History and origin of science of psychology, Definitions &	Scope of Psychology, Relevance to nursing, Methods of
Psychology.	
Unit-2 Biology of behaviour	7 Hours

Body mind relationship- modulation process in health and illness;

Genetics and behaviour: Heredity and environment;

Brain and Behaviour- nervous system, neurons and synapse, Association Cortex, Rt and Lt Hemispheres, Psychology of Sensations, Muscular and glandular controls of behavior, Nature of behaviour of an organism/Integrated_responses.

Unit-3 Cognitive processes

24 Hours

Attention:

Types, determinants Duration & degree, alterations;

Perception: Meaning, Principles factors affecting, Errors;

Learning: Nature, Types, learner and learning, Factors influencing, laws and theories, process, transfer, study habits:

Memory: Meaning, Types, Nature Factors influencing, Development Theories and methods of memorizing and Forgetting

Thinking: Types and levels, stages of development, Relationship with language and communication; **Intelligence**: Meaning, classification, uses, theories;

Aptitude: Concept, types, Individual differences and variability; Psychometric assessments of cognitive processes; Alterations in cognitive processes; Applications

Unit-Motivation 12 Hours

Definition, Purpose, scope and need, Basic principles, Organization of counseling services, Types of counseling approaches ,Role and preparation of counselor, Issues for counseling in nursing: students and practitioners, Counseling process — steps & techniques, tools of counselor ,Managing disciplinary problems, Management of crisis & referr Motivation: Meaning, Concepts, Types, Theories, Motives and behavior, Conflicts and frustration, conflict resolution. Emotions & stress Emotion: Definition, components, Changes in emotions, theories emotional adjustments, emotions in health and illness. Stress: stressors, cycle, effect, adaptation & coping. Attitude: Meaning, nature, development, factors affecting, Behaviour and attitudes Attitudinal change, Psychometric assessments of emotions and attitudes, Alterations in emotions Applications.

Unit-5 Personality 9 Hours

Definitions, topography, types, Theories, Psychometric assessments of personality, Alterations in personality, Applications, Alterations in disease, Applications and implications in nursing

UNIT-6 Developmental psychology

9 Hours

Psychology of people at different ages from infancy to old age., Psychology of vulnerable individuals-challenged, women, sick, etc., Psychology of groups.

UNIT-7 Mental hygiene and mental health

11 Hours

Concepts of mental hygiene and mental health., Characteristics of mentally healthy person., Warning signs of poor mental health., Promotive and Preventive mental health- strategies and services, Ego Defense mechanisms and implications., Personal and social adjustments., Guidance and counseling., Role of nurse.

UNIT-8 Psychological assessment & tests

6 Hours

Types, development, Characteristics, Principles, Uses, Interpretations and Role of nurse in psychological assessment.

This course is designed to enable students to acquire understanding of fundamentals of Microbiology and identification of various micro-organisms. It also provides opportunities for practicing infection control measures in hospital and community settings.

Course Outcomes

CO1	scribe concepts and principles of microbiology.
CO2	Identify structure, classification, morphology of microbes and demonstrate various laboratory methods used to study microbes.
CO3	Describe measures for infection control and role of nurse to prevent infection in the hospital by providing health education.
CO4	Summarize different types of disease producing microorganism and parasites in human body.
CO5	Demonstrate role of nurse in utilizing aseptic technique while collecting, handling and transportation of various specimens.
CO6	Explain the basic concept and importance of immune system and appreciate the importance of immunization and immunoprophylaxis to prevent infectious disease.

Text Book (s)

- 1. Dr. C.P Baweja Textbook of Microbiology for Nursing , 2007, Jaypee
- 2. Dr. Arora Essentials of Microbiology for BSc Nursing Students, 2008, CBS
- **3.** Anju Dhir–Textbook of Microbiology for BSc & Post Basic Nursing Students , 2019, Atithi Medical Books.

- 3. 3.Apurba S Sastry Essentials of Microbiology ,2018.
- 4. Apurba S Sastry Review of Microbiology and Immunology ,2019,

Course Content:

Unit-1 Introduction

5 Hours

Importance and relevance to nursing, Historical perspective, Concepts and terminology, Principles of microbiology

Unit-2 General Characteristics of Microbes

14+7 Hours

Structure and classification of Microbes, Morphological types, Size and form of bacteria, Motility Colonization, Growth and nutrition of microbes, Temperature, Moisture, Blood and body fluids Laboratory methods for Identification of Microorganisms, Staining techniques, Gram staining, Acid fast staining, Hanging drop preparation Culture; various medias

Unit-3 Infection control 14+2 Hours

Infection: Sources, portals of entry and exit, transmission, Asepsis, Disinfection; Types and methods, Sterilization; Types and Methods, Chemotherapy and antibiotics, Standard safety measures, Biomedical waste management, Role of Nurse, Hospital acquired infection, Hospital infection control programme, Protocols, collection of samples, preparation of report and status of rate of infection in the unit/hospital, nurse's accountability, continuing education etc

Unit-4 Pathogenic organisms

16+6 **Hours**

Micro-organisms - Cocci — gram positive and gram negative, bacilli— gram positive and gram negative, Spirochaete, Mycoplasma, Rickettsiae, Chlamydiae, Viruses - Fungi -Superficial and Deep, mycose, Parasites, Rodents & vectors, Characteristics, Source, portal of entry, transmission of infection Identification of disease producing micro-organisms, Collection, handling and transportation of various specimens.

Unit-5 Immunity 11+5 Hours

Immunity-Types, classification, Antigen and antibody reaction, Hypersensitivity — skin test Serological tests, Immunoprophylaxis, Vaccines & sera -Types & Classification, storage and handling, cold chain, Immunization for various diseases, Immunization Schedule.

Course Content:

Unit-1 Introduction to English	10 Hours
Review of Grammar Remedial study of Grammar, Building Vocabulary,	
Phonetics, Public Speaking.	
Demonstrate use of dictionary, Class room Conversion, Exercise on use of grammatical design of the conversion of the con	mar, Practice in public
speaking	_
Unit-2 Develop ability to read, understand and express meaningfully	30 Hours
the prescribed text, Read and comprehend prescribed course books	
Reading, Summarizing, Comprehension	

Unit-3 Various forms of Composition

10 Hours

Letter writing, Note taking, Precise writing, Nurses notes, Anecdotal records, Diary writing, Reports on health problems etc., Resume/CV

Letter writing, Nurses Notes, Precise, Diary, Anecdote, Health problems, Story writing, Resume/CV, Essay Writing, Discussion on written reports/ documents

Unit-4 Spoken English

6 Hours

Oral report, Discussion, Debate, Telephonic Conversation

Debating, Participating in Seminar, panel, symposium, Telephonic Conversation

Unit-5 Learning Comprehension

4 Hours

Media, audio, video, speeches etc

Listening to audio, video tapes and identify the key points

This course is designed to help the students to develop and understanding of the philosophy, objectives, theories and process of nursing in various clinical settings. It is aimed at helping the students to acquire knowledge, understanding and skills in techniques if nursing and practice them in clinical settings.

Course Outcomes

CO1	Perform admission, discharge and patient assessment procedures and provide nursing care by
	using steps of nursing process.
CO2	Demonstrate all basic nursing procedures as per the log book/procedure manual prescribed by
	INC, for providing nursing care to patients in the hospital and community setting.
CO3	Perform infection control procedure and practice standard safety precautions (universal
	precautions) while caring for the patient.
CO4	
	Communicate effectively with patient, families and team members and maintain effective IPR.
CO5	
	Administer drugs; provide care to the dying and dead, counsel and support relatives.

Course Content:

Unit-1 Hospital admission & discharge	5 Hours
Admission, Prepare unit for new patient, Prepare admission bed, Perform adm	
transfer in, Prepare patient records, Discharge/Transfer out, Discharge counsely	
procedure, Prepare records of discharge/transfer, dismantle & disinfect unit an	nd equipment after
discharge/transfer.	
Unit-2 Perform Assessment	5 Hours
History taking, Nursing diagnosis, problem list, Prioritization, Goals & expect	ted outcomes, selection of
intervention, Write nursing care plan, Giving care as per the plan.	
Unit-3 Communication & Reporting	5 Hours
Use verbal & non verbal communication techniques, prepare a plan for patient	t teaching session, change of
shift reports, transfer reports, Incident reports etc., present patients report.	
Unit-4 Vital Signs	5 Hours

Measure, Records and interpret alterations in body temperature, Pulse, Respiration and Blood pressure

Unit-5 Health Assessment

30 Hours

Health history taking, Perform assessment- general, body systems, Use various methods of physical examination, Inspection, Palpation, Percussion, Auscultation, Olfaction, Identification of system wise deviations.

UNIT-6 Prepare patient's unit

15 Hours

Prepare beds- open, closed, occupied, operation, amputation, cardiac, fracture, burn, divided & fowlers bed, Pain assessment and provision for comfort, Use of comfort devices.

UNIT-7 Meeting needs of the patient

70 Hours

Hygienic care- oral hygiene, bath & care of pressure points, Hair wash, Pediculosis treatment, Feeding- Oral, Enteral, Naso/Orogastric, gastrostomy & parentral feeding, Naso-gastric insertion, suction & irrigation, Assisting patient in urinary elimination- provide urinal/bed pan, Condom drainage, Perineal care, Catheterization, Care of urinary drainage, Bladder irrigation assisting bowel elimination- Insertion of flatus tube, Enemas, Insertion of suppository, Bowel wash, Body alignment & mobility- Range of motion exercises, Positioning- Recumbent, Lateral, Fowlers, Sims, Lithotomy, Prone, Trendelenburg position, Assist patient in moving, lifting, transferring, walking, Restraints, Oxygen administration, Suctioning, Chest PT and postural drainage, Care of chest drainage, CPR-Basic life support, Intravenous therapy, Blood & blood component therapy, Specimen collection for investigations, Perform lab tests, Hot & cold applications, Communicating & assisting with self-care of – visually & hearing impaired patients, mentally challenged & disturbed patients, alteration of sensorium, Recreational & diversional therapies.

UNIT-8 Infection control

15 Hours

Perform following procedures- Hand washing techniques, Simple, Hand antisepsis, surgical antisepsis(scrub), Prepare isolation unit in lab/ward, Practice technique of wearing & removing Personal protective equipment (PPE), Practice standard safety precautions, Decontamination of equipment & unit-Surgical asepsis: sterilization, Handling sterilized equipment, calculate strength of lotions, Prepare lotions, Care of articles.

UNIT-9 Pre & perioperative care

15 Hours

Skin preparation for surgery, Preparation of post operative unit, Pre and post operative teaching and counseling, pre and post operative monitoring, Care of the wound- Dressing, suture care, care of drainage, Application of Bandages, Binders, Splints & Slings, Bandaging of various parts.

UNIT-10 Administration of medication

30 Hours

Administer medications in different forms & routes- Oral, Sublingual & Buccal, Parentral- Intradermal, Subcutaneous, Intramuscular, Intravenous, assist in intravenous medications, Drug measurement & dose calculation, Preparations of lotions & solutions, Administers topical application, Insertion of drug into body cavity- suppository & medicated packing, Instillation of medication and spray into ear, Eyes, Nose & T Hoursoat, Irrigations- Eye & Ear, Bladder, Vagina & Rectum, Inhalations- Dry & moist.

UNIT-11 Care of dying patient

5 Hours

Caring & Packing of the dead body, counseling & supporting grieving relatives, Terminal care of the unit.

BSC NURSING 2ND YEAR

Name of The Course	Sociology				
Course Code	BSCN2001				
Prerequisite	10+2 with PCB 55%				
Corequisite	Sociology books				
Antirequisite	NA				
		L	T	P	C
		2	0	0	2

Course Objectives:

This course is designed to introduce the concepts of sociology related to community and social institutions in India and its relationship with health, illness and nursing.

Course Outcomes

CO1	Describe the concept, importance of sociology and interrelationship of individuals in the society	
CO2	Explain influence of culture on health and diseases	
CO3	Identify social group and their interaction among each other	
CO4	Describe the growth of population in India and its impact on health	
CO5	5 Describe institution of family, marriage and their influence on health and health practices	
CO6	Describe the role of nurse in social stratification, rural urban community, social change, social organization, social system, social control and social problems in India.	

Text Book (s)

- 1. KP Neeraja "Text book of Sociology for nursing students".1st edition 20014; Jaypee publishers
- 2. TK Indrani "Text book of sociology for nurses" 2^{nd th} edition 2012; Jaypee publishers

Reference Book (s)

- 1. I Clement "Sociology for nurses" 2nd edition 2010, pearson publishers
- 2. Krishne Gowda "sociology for nurses" 2nd edition, CR Publishing house
- 3. Karen willis and Shandell Elmer "Society, culture and health "1st edition, Oxford publications

Course Content:

Unit-1 INTRODUCTION

1 hour

Definition of Sociology

Nature and Scope of the discipline

Importance and application of Sociology in Nursing

Unit-2 Individual & Society

Society and Community

Nature of Society, Difference between Society and Community

Process of Socialization and individualization

Personal disorganization

Unit-3 Culture

5 Hours

3 Hours

Nature of culture, Evolution of culture

- Diversity and uniformity of culture
- Culture and socialization, Transcultural society
- Influence on health and disease

Unit-4 Social groups and processes

6 Hours

The meaning and classification of groups primary and secondary groups

Group: In-group V/s. Out-group,

Class Tribe, Caste, Economic, Political, Religious groups, Mob, Crowd, Public and Audience Interaction & Social Processes

Co-operation, Competition, Conflict

Accommodation, Assimilation & Isolation

Unit-5 Population

8 Hours

Society and population

- Population distribution in India- Demographic characteristics
- Malthusian theory of Populations
- Population explosion in India and its impact on health status
- Family welfare programmes

Unit-6 Family and marriage

7 Hours

Family-Functions

• Types-Joint, Nuclear, Blended and extended family:

Characteristics

- The Modern Family Changes, Problems-Dowry etc., welfare Services
- Changes & legislations on family and marriage in India marriage acts
- Marriage: Forms and functions of marriage,
- Marriage and family problems in India
- Family, marriage and their influence on health and health practices

Unit-7 Social stratification meaning and types of social stratification

The Indian Caste System- origin & features, Features of Caste in India Today

- Social Class system and status
- Social Mobility-Meaning & Types
- Race as a biological concept, criteria of racial classification
- Salient features of Primary races- Racism

• Influence of Class, Caste and Race on health and health practices

Unit-8 Types of communities in India

Types of Communities in India

8 Hours

9 Hours

(Rural, Urban and Regional)

(Rurar, Orban and Regionar)

Features of village ,community& Characteristics of Indian villages- Panchayat system, social dynamics Community Development, project & planning

Changes in Indian Rural Life, Availability of health facilities in rural and its impact on health and health practices Urban Community features

The growth of cities: Urbanization and its impact on health and health practices

Unit-9 Social change

6 Hours

- Nature and process of Social Change
- Factors influencing Social change: cultural change, Cultural lags.
- Introduction to Theories of social change: Linear, Cyclical, Marxian, Functional

Role of nurse-Change agents

Unit-10 Social organization and social system

6 Hours

- Democratic and authoritarian modes of participation,
- Voluntary associations
- Social system: Definition and Types of social system
- Role and Status as structural elements of social system

Inter-relationship of institutions

Unit-11 Social Control

4 Hours

- Nature and process of social control
- Political, Legal, Religious, Educational, Economic, Industrial and Technological systems,

Norms & Values- Folkways & Mores, Customs, Laws and Fashion

Role of Nurse.

Unit-12 Social problems

17 Hours

Social disorganization

- Control & planning: poverty, housing, illiteracy, food supplies, prostitution, rights of women & children, vulnerable groups: Elderly, handicapped, minority groups and other marginalized groups, child labour, child abuse, delinquency and crime, substance abuse, HIV/AIDS.
- Social Welfare programmes in India

Role of nurse

- 1. This course is designed to enable students to acquire knowledge of pathology of various disease conditions and apply this knowledge in practice of nursing.
- This course is designed to enable students to acquire understanding of Pharmacodynamics, Pharmacokinetics and Principles of Therapeutics and Nursing implications.
- 3. This course is designed to enable students to acquire understanding of Genetics, its role in causation and management of defects and diseases.

Course Outcomes

COA1	Explain the importance of study of pathology in nursing and differentiate between normal and		
	abnormal structure and function of human body system.		
COA2	Demonstrate and Identify pathological changes in disease condition of various systems.		
COA3	Demonstrate various laboratory tests for examination of blood, urine and other body fluids to monitor disease conditions and role of nurse in infection control.		
COB1	Describe pharmacodynamics, pharmacokinetics and principles of drug administration.		
COB2	Demonstrate chemotherapy used for specific infection & infestations.		
совз	Recognize action, side effects, dosage, routes of drugs used for treating diseases relating to all body systems.		
СОВ4	Demonstrate drugs used in emergency, CPR, de-addiction, vaccine & sera, vitamins and minerals deficiency and alternative system of medicine and role of nurse.		
COC1	Explain the nature, principle and perspectives of heredity and genetics and its practical application in counseling patience with genetic disorders.		
COC2	Demonstrate maternal and genetic influences on developmental defects and diseases in children and their management.		
COC3	Demonstrate screening methods used for genetic defects and diseases in neonates, children, adolescents and adults.

PATHOLOGY

Unit-1 INTRODUCTION

5 Hours

Importance of the study of pathology, Definition of terms, Methods and techniques, Cellular and Tissue changes, Infiltration and regeneration, Inflammations and Infections, Wound healing, Vascular changes, Cellular growth, Neoplasms Normal and Cancer cell, Benign and Malignant growths, In situ carcinoma, Disturbances of fluid and electrolyte imbalance.

Unit-2 Pathological changes in disease conditions of various systems:

14 Hours

Respiratory tract-Tuberculosis, Bronchitis, Pleural effusion and pneumonia, Lung abscess, emphysema, bronchieatasis, Bronchial asthma, C Hoursonic obstructive Pulmonary disease & tumours.

Cardiovascular system

Pericardial effusion, Rheumatic heart disease, Infective endocarditis, atherosclerosis, Ischemia, infarction & aneurysm

Gastro Intestinal Tract

- Peptic ulcer, typhoid,

Carcinoma of GI tract - buccal, Esophageal,

Gastric & intestinal, Liver, Gall bladder & pancreas, Hepatitis, C Hoursonic liver abscess, cirrhosis, Tumours of liver, gall bladder and pancreas, Cholecystitis

- Kidneys & Urinary tract
- Glomerulonep Hoursitis, pyelonep Hoursitis, Calculi, renal failure, renal, carcinoma & cystitis
- Male genital systems

Cryptorchidism testicular, atrophy, Prostatic hyperplasia, Carcinoma Penis & prostate

- Female genital system.

Fibroids, Carcinoma cervix and Endometrium, Vesicular mole, choriocarcinoma, Ectopic gestation, Ovarian cyst & tumours, Cancer Breast.

Central Nervous system

Hydrocephalus, Meningitis, encephalitis,

Vascular disorders

T Hoursombosis, embolism, Stroke, paraplegia, quadriplegia

- Tumours, meningiomas

Unit-3 Clinical pathology

6 Hours

Various blood and bone marrow tests in assessment and monitoring of disease conditions
Hemoglobin .RBC. White cell & platelet counts, Bleeding time, clotting time and prot Hoursombine
time, Blood grouping and cross matching, Blood chemistry, Blood culture, Serological and immunological
tests, Other blood tests, Examination of Bone marrow, Methods of collection of blood, specimen for various clinical,
pathology, biochemistry, microbiology tests, inference and normal values

Unit-4 Examination of body cavity fluids, transudates and exudates

4 Hours

The laboratories tests used in CSF analysis, Examination of other body cavity fluids, transudates and exudates sputum, wound discharge etc. Analysis of gastric and duodenal contents. Analysis of semen-sperm count, motility and morphology and their importance in infertility. Methods of collection of CSF and other cavity fluids specimen for various clinical pathology, biochemistry, microbiology tests, inference and normal values.

Unit-5 Urine and Faeces

1 Hour

Urine

- Physical characteristics, Analysis, Culture and sensitivity.

Faeces

Characteristics, Stool examination: occult blood, ova, parasite and cyst, reducing substance etc.

Methods of collection for various tests, inference and normal values.

PHARMACOLOGY

Unit-1 Introduction to Pharmacology

8 Hours

- •Definitions •Sources •Terminology used •Types: Classification •Pharmacodynamies: Actions, therapeutic,
- •Adverse, toxic •Pharmacokinetics:absorption, distribution, metabolism, interaction, excretion •Review: Routes and principles of administration of drugs •Indian pharmacopoeia: Legal issues Rational use of drugs
- •Principles of therapeutics

Unit-2 Chemotherapy

6 Hours

Pharmacology of commonly used; Penicillin Cephalosporins. Aminoglycosides, Macrolide & Broad Spectrum Antibiotics, Sulfonamides, Quinolones. Antiamoebic, Antimalarials, AntheImintics, Antiscabies agents, Antiviral & antifungal agents. •Antitubercular drugs•Anti leprosy drugs•Anticancer drugs •Immuno-suppressants Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse.

Unit-3 Pharmacology of commonly used antiseptics, disinfectants and insecticides. 2 Hours

• Antiseptics; Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse • Disinfectants • Insecticides

Unit-4 Drugs acting on G.I. system

2 Hours

• Pharmacology of commonly used- Antiemetics, - Emetics - Purgatives - Antacids - Cholinergic-Anticholinergics - Fluid and electrolyte therapy - Anti diarrhoeals - Histamines Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse

Unit-5 Drugs used on Respiratory Systems

2 Hours

• Pharmacology of commonly used- - Antiasthmatics, Mucolytics, Decongestants, Expectorants, Antitussives Bronchodilators, Broncho constrictors, Antihistamines, Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, Adverse effects, toxicity and role of Nurse.

Unit-6 Drugs used on Urinary System Pharmacology of commonly 2 Hour

used-•Diuretics and antidiuretics •Urinary antiseptics •Cholinergic and •anticholinergics

Acidifiers and alkalanizeis •Composition, action, •dosage, route, indications, • contraindications, drug interactions, side effects, adverse • effects, toxicity and role of Nurse.

Unit-7 Miscellaneous

4 Hours

- Drugs used in de-addiction Drugs used in CPR and emergency Vitamins and minerals Immunosuppressant
- Antidotes Antivenom Vaccines and sera

Unit-8 Drugs used on skin and mucous membranes

2 Hours

Topical applications for skin, eye, ear, nose and buccal cavity, Antipruritics, Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse

Unit-9 Drugs acting on Nervous system

8 Hours

Basic & applied pharmacology of commonly used: Analgesics and Anaesthetics

Analgesics - Non steroidal anti Inflammatory (NSAID) drugs Antipyretics Hypnotics and Sedatives- Opioids

- Non-Opioids – Tranquilizers - General 1 & local anesthetics - Gases: oxygen, nitrousoxide, carbon dioxide Cholinergicc and anti-cholinergic: Musclerelaxants Major tranquilizers, Anti-psychotics, Antidepressants Anticonvulsants., Adrenergics, Noradregenics, Mood stabilizers, Acetylcholine, Stimulants, Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse.

Unit-10 Cardiovascular drugs

2 Hours

• Haematinics • Cardiotonics, • Anti anginals • Anti-hypertensives & Vasodilators • Anti-arrhythmics Plasma expanders • Coagulants & anticoagulants • Antiplatelets & t Hoursombolytics • Hypolipidemics Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity, role of Nurse

Unit-11 Drugs used for hormonal disorders and supplementation, contraception and medical termination of pregnancy 4 Hours

• Insulins & Oral hypoglycemic • Thyroid supplements and suppressants • Steroids, Anabolics • Uterine stimulants and relaxants • Oral contraceptives • Other estrogen-progestrone preparations • Corticotrophine & Gonadotropines • Adrenaline. • Prostaglandins - • Calcitonins • Calcium salt • Calcium regulators Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse.

Unit-12 Introduction to Drugs used in alternative systems of medicine:

6 Hours

• Ayurveda, Homeopathy, Unani and Siddha etc

GENETICS

Unit-1 Introduction: 4 Hours

- Practical application of genetics in Nursing Impact of genetic condition on families Review of cellular division mitosis and meiosis. Characteristics and structure of genes C Hoursomosomes sex determination
- C Hoursomosomal aberrations Patterns of inheritance Mendalian theory of inheritance Multiple allots and blood groups Sex linked inheritance. Mechanism of inheritance. Errors in transmission (Mutation)

4 Hours

Unit-2 Maternal, prenatal and genetic influences on development of defects and diseases

- Conditions affecting the mother: genetic and infections Consanguinity atopy Prenatal nutrition and food allergies.
- Maternal Age Maternal drug therapy Prenatal testing and diagnosis Effect of Radiation, drugs and chemicals Infertility• Spontaneous abortion. Nueral Tube defects and the role of folic acid in lowering the risk. DownsSyndrome(Trisomy 21)

Unit-3 Genetic testing in the neonates and children

3 Hours

• Screening for - Congenital abnormalities - Developmental delay- Dysmorphism

Unit-4 Genetic conditions of adolescents and adults

3 Hours

• Cancer genetics — Familial Cancer • Inborn errors of metabolism • Blood group alleles and haematological disorder • Genetic haemoc Hoursomoatosis • Huntington's disease• Mental illness

Unit-5 Services related to Genetics

6 Hours

. Genetic testing • Human genome project • Gene therapy • The Eugenics movement • Genetic Counselling Legal and Ethical issues Role of nurse

Internal Assessment (IA)	Mid Term Exam (MTEI+MTEII)	End Term Exam (ETE)	Total Marks
15	5+5	75	100
Name of The Course	Medical Surgical Nursing-1		

Course Code	BSCN2003		
Prerequisite	KNOWLEDGE of anatomy ,physiology and microbiology		
Corequisite	Anatomy physiology lab with models, charts, log book, Group projects,		
	Video film, Anatomy & Physiology Atlas		
Antirequisite	NA		
	L T P C		
	4 0 0 4		

The purpose of this course is to acquire knowledge and develop proficiency in caring for patients with medical and surgical disorders in varieties of health care settings and at home.

Course Outcomes

CO1	Describe and appreciate the emerging trends in medical and surgical nursing conditions and role of nurse in caring the adult patient in hospital and community.
CO2	Demonstrate common sign and symptoms, problems of specific disease conditions and their specific nursing interventions.
CO3	Explain and identify etiology, pathophysiology, clinical manifestations, diagnostic measures, management and prevention of complications of adult patients suffering with various medical conditions.
CO4	Explain and identify etiology, pathophysiology, clinical manifestations, diagnostic measures, management and prevention of complications of adult patients suffering with various surgical conditions.
CO5	Explain and identify etiology, pathophysiology, clinical manifestations, diagnostic measures, management and prevention and control of communicable diseases in adult and elderly patients.
CO6	Describe and identify the organization, physical set up, instruments/ equipments used, infection control & standard safety measures taken by nurses while working in operation theatre, intensive care unit and coronary care unit and dialysis unit etc.

- **4.** Carpenito Nursing Care Plans & Documentation Carlpenito Nursing Diagnosis ,2009,LWW

Course Content:

Unit-1 Introduction	15 Hours
Introduction to medical surgical nursing	

Introduction to medical surgical nursing- Evolution and trends of medical and surgical nursing • Review of Concepts of Health and illness Disease-concepts, causations, classification-International Classification Diseases (ICD- 10 or later version), Acute illness C Hoursonic illness & Terminal illness, stages of illness, Review of concepts of comprehensive nursing care in medical surgical conditions based on nursing process, Role of Nurse, patient and family in care of adult patient, Role and responsibilities of a nurse in medical surgical settings: Outpatient department. - In-patient unit, Intensive care unit. Home and Community settings Introduction to Medical Surgical asepsis Inflammation and Infection – Immunity Wound healing Care of Surgical Patient -Pre-operative Intra operative -Post Operative

Unit-2 15 Hours

Common signs and symptoms and management

Fluid and electrolyte imbalance. Vomiting, Dyspnea and cough, Incontinence respiratory obstruction, Fever Shock, Unconsciousness, Edema Syncope, Pain Age related problems-geriatric

Unit-3 20 Hours

Nursing management of patients (adults including elderly) with respiratory problems

Review of anatomy and physiology of respiratory system, • Nursing Assessment-History and Physical assessment Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of adults including elderly with – Upper Respirator' that infection Bronchitis Asthma Emphysema Empyema Atelectasis C Hoursonic Obstructive Pulmonary Diseases (COPD) Bronchiectasis Pneumonia• Pulmonary tuberculosis • Lung abscess Pleural effusion Cysts and Tumours • Chest injuries Respiratory arrest and insufficiency Pulmonary embolism special therapies, alternativeTherapies Nursing procedures Drugs used in treatment of respiratory disorders

Unit-4 30 Hours

Nursing management of patient (adults including elderly) with disorders of digestive system

Review of anatomy and physiology of digestive system • Nursing Assessment-History and Physical assessment Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management Disorders of Oral cavity- lips, gums, and teeth Oesophagus —inflammation? stricture, obstruction, bleeding and tumours Stomach and deudenumhiatus hernia, gastritis, peptic and deudenal ulcer, bleeding, tumours, pyloric stenosis Small intestinal disorders inflammation and infection, entritis, malabsorption, obstruction, tumour and perforation Large intestinal disorders-Colitis, inflammation and infection, obstruction and tumour and lump Hernias Appendix-inflammation, mass, abscess, rupture Anal & Rectum; hemorrhoids, fissures, Fistulas • Peritonitis/acute abdomen Pancreas; inflammation, cyst, abscess and tumours Liver; inflammation, cyst, abscess, cirrhosis, portal hypertension, hepatic failure, tumours Gall Bladder; inflammation, obstruction, stones and tumours Special therapies, alternative therapies Nursing procedures Drugs used in treatment of disorders of digestive system

Unit-5 30 Hours

Nursing management of patient (adults including elderly) with blood and cardio vascular problems

Review of anatomy and physiology of blood and cardio vascular system, Nursing Assessment-History and Physical assessment Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of-Vascular system Hypertension, Hypotension - Artherio sclerosis Raynaud's disease Aneurism and Peripheral vascular disorders Heart Coronary artery diseases • Ischemic Heart Disease, Cornory atherosclerosis Angina pectoris Myocardial infarction Valvular disorders of the heart Congenital and acquired - Rheumatic Heart diseases Endocarditis, Pericarditis Myocarditis Cardio Myopathies Cardiac dysrhythmias, Heart Block Congestive cardiac failure Cor-pulmonale, pulmonary edema, cardiogenic shock, cardiac tamponade Cardiac emergencies and arrest Cardio Pulmonary Resuscitation (CPR) • Blood Anaemias Polycythemia Bleeding disorders; clotting factor defects and platelets defects Thalassemia Leukaemias Leukopenias and agranulocytosis Lymphornas Myelornas Special therapies Blood transfusion, safety checks, procedure and requirements, management of adverse transfusion reactions:, records for blood transfusion. Management and counseling of blood donors, phlebotomy procedure, and post donation management. Blood hank functioning and hospital transfusion committee. Bio-safety and waste management in relation to blood transfusion Role of a nurse in Organ donation, retrieval and banking Alternative therapies Nursing procedures Drugs used in treatment of blood and cardio vascular disorders

Unit-6 10 Hours

Nursing management of patient (adults including elderly) with genito-urinary problems

Review of anatomy and physiology of genito-urinary system Nursing Assessment-History and Physical assessment Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of- Nep Hoursitis Nep Hoursotic syndrome • Nep Hoursosis Renal calculus • Tumours Acute renal failure C Hoursonic renal failure End stage renal disease Dialysis, renal transplant Congenital disorders, urinary infections Benign prostate hypertrophy. • Disorders of ureter, urinary bladder and urethera inflammation, infection, stricture, obstruction,

tumour, prostrate Special therapies, alternative therapies Nursing procedures Drugs used in treatment of genitourinary disorders

Unit-7 5 Hours

Nursing Management of disorders of male(adults including elderly) reproductive system

Review of anatomy and physiology of male reproductive system Nursing Assessment-History and Physical assessment Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of disorders of male reproductive system Congenital malformations; Hypospadiasi Alospadiasis, Epispadiasis • Infections Testis and adjacent structures Penis Prostate: inflammation, infection, hypertrophy, tumour Sexual Dysfunction Infertility Contraception Breast; gynecomastia, tumour • Climacteric changes Special therapies, alternative therapies Nursing procedures Drugs used in treatment of disorders of male reproductive system.

Unit-8 10 Hours

Nursing management of patient(adults including elderly) with disorders of endocrine system

Review of anatomy and physiology of endocrine system Nursing Assessment-History and Physical assessment Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of- Disorders of Thyroid and Parathyroid Diabetes mellitus Diabetes insipidusAdrenal tumour Pituitary disorders. Special therapies, alternative' therapies Nursing procedures Drugs used in treatment of disorders of endocrine system.

Unit-9 10 Hours

Nursing management of patient (adults including elderly) with disorders of Integumentary system

Review of anatomy and physiology of Skin and its appendages Nursing Assessment-History and Physical assessment Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of disorders of skin and its appendages —Lesions and abrasions Infection and infestations; Dermititis Dermatoses; infect mis and Non infectious "inflammatory dermatoses" Acne Vulgaris Allergies and Eczema • Psoriasis Malignant melanoma • Alopecia Special therapies, alternative therapies Nursing procedures Drugs used in treatment of disorders of Integumentary system.

Unit-10 15 Hours

Nursing management of patient (adults including elderly) with musculoskeletal problems

Review of anatomy and physiology of musculoskeletal system, Nursing Assessment-History and Physical assessment Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of -Disorders of:Muscles, Ligaments and Joints - inflammation, infection, trauma Bones-inflammation, infection, dislocation, fracture, tumour and trauma • Osteomalacia and osteoporosis Art Hoursitis Congenital deformities Spinal column- defects and deformities, Tumor, Prolapsed inter vertebral disc, pott's spine Paget's disease Amputation Prosthesis Transplant & replacement surgeries Rehabilitation. Special therapies, alternative therapies Nursing procedures Drugs used in treatment of disorders of musculoskeletal system.

Unit-11 10 Hours

Nursing management of patient (adults including elderly) with Immunological problems

Review of Immune system, Nursing Assessment-History and Physical assessment Etiology, Pathophysiology, clinical manifestations, diagnosis. treatment modalities and medical, surgical, dietetics & nursing management of-

Immunodeficiency disorder. • Primary immuno deficiency. Phagocytic dysfunction B-cell and T-cell deficiencies, Secondary immunodeficiencies Acquired immunodeficiency syndrome (AIDS) Incidence of HIV & AIDS Epidemiology Transmission-Prevention of Transmission Standard Safety precautions • Role of Nurse; Counseling • Health education and home care consideration. National AIDS Control Program • NACO, various national and international agencies Infection control program • Rehabilitation. Special therapies, alternative therapies Nursing procedures Drugs used in treatment of disorders of immune logical system.

Unit-12 20 Hours

Nursing management of patient (adults including elderly) with Communicable Diseases

- Overview of infectious disease, the infectious process Nursing Assessment-History and Physical assessment
- Epidemiology, infectious process, clinical manifestations, diagnosis, treatment, prevention and dietics. Control and eradication of common Communicable Diseases Tuberculosis diarrhoeal diseases hepatitis A E herpeschickenpox smallpox, typhoid, meningitis,gas gangrene leprosy.Dengue Plague Malaria Diptheria Pertussis Poliomyelitis Measles Mump Influenza Tetanus Yellow fever Filarias HIV, AIDS Reproductive Tract Infections Special infection control measures: Notification, Isolation, Quarantine, Immunization, Infectious Disease Hospital Special therapies, alternative therapies Nursing procedures Drugs used in treatment of Communicable diseases

Unit-13 25 Hours

Peri operative nursing

- Organization and Physical set up of the Operation Theatre (OT): Classifications O.T. DESIGN Staffing
- Members of the OT team. Duties and responsibilities of nurse in O.T. Principles of Health and operating room attire.
- Instruments, Sutures and suture materials Equipments O.T. tables and sets for common surgical procedures
- Positions and draping for common surgical procedures• Scrubbing procedures• Gowning and gloving Preparation of O.T. Sets Monitoring the patient during surgical procedures Maintenance of therapeutic environment in
- O.T.Standard Safety measures Infection control; fumigation, disinfection and sterilization
- Biomedical waste management Prevention of accidents and hazards in O.T Anaesthesia Types
- Methods of administration Effects and Stages Equipments Drugs Cardio Pulmonary Resuscitation (CPR)
- Pain management techniques Legal Aspects

Internal Assessment (IA)	Mid Term (MTEI+MTEII)	Exam	End Term Exam (ETE)	Total Marks
15	5+5		75	100

Name of The Course	Community Health Nursing - I					
Course Code	BSCN2004					
Prerequisite	10+2 PCB 55%,					
Corequisite	Community Health Nursing lab with charts, posters, log book					
Antirequisite	NA					
	$oxed{L} oxed{T} oxed{P} oxed{C}$					
	3 0 0 3					

This course is designed for students to appreciate the principles of prevention, promotion and maintenance of health for individuals, families and community that will help to identify communicable and non-communicable diseases and participate in family welfare programs at different community settings.

Course Outcomes

CO1	
	Describe concept, dimensions and determinants of health
CO2	Explain, concept, scope, uses, methods and approaches of epidemiology.
CO3	Elaborate epidemiology and nursing management of common communicable disease and role of nurse in prevention and control.
CO4	Describe epidemiology and nursing management of non communicable diseases.
CO5	Describe the concepts and scope of demography and identify the impact of population explosion and methods of population control

Course Content:

course content.	
UNIT-1 INTRODUCTION	2 Hours
Community Health Nursing: Definition, concept and Dimension	ons of health, Promotion of health, Indicators of
health, Maintenance of health	
UNIT- 2 DETERMINANTS OF HEALTH	20 Hours
Eugenics, Environment, Acts regulating environment, Bacterial,	Viral Agents, Arthopods and rodents, Food
Hygiene and Acts regulating Food Hygiene, Drug cosmetic Act,	Marriage system- custom, Taboos, Life Style,

Hygiene and Acts regulating Food Hygiene, Drug cosmetic Act, Marriage system- custom, Taboos, Life Style Dietary pattern, Financial Management

UNIT-3 EPIDEMIOLOGY 10 Hours

Definition<concept, aims, scope, uses and terminology used in epidemiology, Dynamics of disease transmission, Epidemiological triad, Morbidity and mortality measurements, Levels of prevention, Methods of Epidemiology

UNIT-4 EPIDEMIOLOGY AND NURSING MANAGEMENT OF COMMUNICABLE DISEASES 25 Hours

Respiratory infections- Chicken pox, Measles, Rubella, Influenza, Mumps, Intestinal infections, Whooping cough, Tuberculosis, ARI with pneumonia, Meningococcal meningitis, Cholera, Poliomyelitis, Diarrheoal Diseases, Typhoid fever, Food poisoning, Zoonoses, Arthopod infections, Dengue Malaria, Filariasis, Ant Hoursax, Typhus fever, Scrub typhus, Murine typhus, Hookworm infection, Leismaniasis, Ascariasis, Trachoma, Leprosy, Rabies, STD & RTI, HIV/AIDS

UNIT-5 EPIDEMIOLOGY AND NURSING MANAGEMENT OF NON COMMUNICABLE DISEASES 10 Hours

Malnutrition, Nutritional deficiencies, Anaemia, Hypertension, Diabetes Mellitus, Stroke, Rheumatic heart disease, Coronary heart disease, Blindness, accidents, Mental illness, obesity, Iodine deficiency, Epilepsy, Fluorosis, Cancer

UNIT-6 DEMOGRAPHY

6 Hours

Definition, Concepts, Scope, Methods of Collection, Analysis and Interpretation of demographic data, Demographic rates and ratios.

UNIT-7 POPULATION AND ITS CONTROL

17 Hours

Population Explosion and its impact on social, economic development of individual, society and country, population control: overall development: women empowerment, social, economic and educational development, Limiting family size: Promotion of small family norm, Methods: spacing Natural, biological, chemical, mechanical methods, etc, Terminal: Surgical methods.

This course is designed to help the students acquire an understanding of the principles and methods of communication and teaching. It helps to develop skill in communicating effectively, maintaining effective interpersonal relations, teaching individuals and groups in clinical, community health and educational settings

Course Outcomes

CO1	Review & demonstrate communication process, interpersonal relations & human relation skills in context of nursing.
CO2	Develop basic skill of guidance and counseling process used in nursing
CO3	Describe philosophy, principles, teaching-learning process & various methods used in teaching in classroom, hospitals and community setting.
CO4	Demonstrate teaching skills using various teaching methods in clinical, classroom & community settings.
CO5	Demonstrate the preparation & used of different types of educational media in teaching effectively.
CO6	Demonstrate & develop various innovative assessment strategies to assess knowledge, skills and attitudes.
CO7	Prepare students to use & plan IEC activities by using various methods & medias to educate individuals, groups & community at large.

Course Content:

Unit-1 REVIEW OF COMMUNICATION PROCESS	6 Hours
Process; elements And channel ,Facilitators ,Barriers and methods of	f overcoming Techniques
Unit-2 INTERPERSONAL RELATIONS	6 Hours
Purpose & types ,Phases ,Barriers & methods of overcoming, Johari	Window

Unit-3 HUMAN RELATIONS

6 Hours

Understanding self ,Social behavior, motivation, social attitudes, Individual and groups, Groups & individual, Human relations in context of nursing, Group dynamics, Team work

UNIT-4 GUIDANCE & COUNSELING

12+5 Hours

Definition, Purpose, scope and need, Basic principles, Organization of counseling services, Types of counseling approaches ,Role and preparation of counselor, Issues for counseling in nursing: students and practitioners, Counseling process — steps & techniques, tools of counselor ,Managing disciplinary problems, Management of crisis & referral

UNIT-5 PRINCIPLES OF EDUCATION & TEACHING LEARNING PROCESS 6 Hours

Education: meaning, philosophy, aims, functions & principles, Nature and Characteristics of learn, Principles and maxims of teaching, Formulating objectives; general and specific, Lesson planning, Classroom management.

UNIT-6 METHODS OF TEACHING

11+10 Hours

Lecture, demonstration, group discussion, seminar symposium, panel discussion, role play, project, field trip, workshop, exhibition, programmed instruction, computer assisted learning, micro teaching problem based learning, Self-instructional module and simulation etc.Clinical teaching methods: Case method, nursing round & reports, bedside clinic, conference (individual & group) process recording.

UNIT-7 EDUCATIONAL MEDIA

11+8 Hours

Purposes and types of A.V. Aids, Principles & Sources etc., Graphic aids: chalk board, chart, graphs, posters, flash cards, flannel graph, bulletin, cartoon, 3 Dimensional Aids: Objects, Specimens, Models, Puppets, Printed Aids: Pamphlets & leaflets. Projected Aids: Slides, OHP, Films, TV, VCR/ VCD, Camera, Microscope, LCD. Audio Aids: Tape recorder, public address system. Computer.

UNIT-8 ASSESSMENT

6+7 Hours

Purpose and scope of evaluation and assessment, Criteria for selection of assessment, techniques and methods, Assessment of knowledge: Essay type questions, Short answer questions (SAQ). Multiple Choice Questions (MCQ). Assessment of skills: Observation Check List, Practical Exam, Viva, Objective Structured clinical examination (OSCE)

Assessment of attitude: Attitude scales.

UNIT-9 INFORMATION, EDUCATION & COMMUNICATION FOR HEALTH (IEC) 6 Hours

Health behavior & health education, Planning for health education, Health education with individuals, groups & communities, Communicating health messages, Methods & media for communicating health messages, Using mass media

This course is designed to help the students to develop and understanding of the philosophy, objectives, theories and process of nursing in various clinical settings. It is aimed at helping the students to acquire knowledge, understanding and skills in techniques if nursing and practice them in clinical settings.

Course Outcomes

CO1	Develop skills in providing nursing care to adult patients with medical and surgical
	conditions concerning all systems of human body and prepare them for home care.
CO2	Identify instruments and equipments used for common surgical and medical procedures in
	the wards, operation theatre and critical care units.
CO3	Develop skills in advanced nursing procedures to practice in all medical and surgical
	conditions including emergencies and critical care settings.
CO4	Develop skills in infection control practices and bio medical waste management to prevent
	nosocomial infection in the hospital and community settings.

Unit-1 Introduction 180 Hours

General Medical Ward (Respiratory. Endocrine, Renal,)

Assessment of the Patient Taking history Perform general and specific physical examination.

Identify alterations and deviations Practice medical surgical asepsis- Standard safety measures Administer

medications Oral, IV, IM, Subcutaneous• IV therapy IV canulation Maintenance and monitoring Oxygen therapy by different methods• Nebulization Chest physio therapy Naso gastric feeding Assist in common diagnostic

Perform Assist in therapeutic procedures Blood and component therapy T Hoursoat Suctioning Collect specimens for common investigations. Maintain elimination Caricaturisation Bowel wash Enema Urinary drainage Maintain Intake, output and documentation Counsel and teach related to specific disease conditions

Unit-2 180 Hours

General Surgical Ward (GI, Urinary, CTVS)

- Practice medical surgical asepsis- Standard safety measures• Pre operative preparation of patients Post operative care Receiving Pt, assessment, monitoring, care, Care of wounds and drainage Suture removal
- Ambulation and exercise Naso gastric aspiration Care of chest drainage Ostomy care Gastrostomy Colostomy Enterostomy Blood and component therapy Practice universal precautions

Unit-3 150 Hours

Cardiology ward

Physical examination of the cardio vascular system Recording and interpreting ECG Monitoring of patients Preparation and assisting in non-invasive and invasive diagnostic procedures. Administer cardiac drugs Cardio pulmonary Resuscitation

Unit-4 30 Hours

Skin &Communicable disease Ward

Assist in diagnostic and therapeutic procedures Administer topical medication Practice medical surgical asepsis - Standard safety measures Use of personal protective equipment(PPE) Give Medicated baths Counseling HIV positive patients Teach prevention of infectious disease

Unit-5 80 Hours

Orthopaedic

Assessment of orthopaedic patients Assist in application of plaster cast and removal of cast Apply skin traction- buck's extension traction. Assist in application and removal of prosthesis Physiotherapy-Range of motion exercises (ROM), muscle strengthening exercises Crutch maneuvering technique. Activities of daily living

Ambulation Teach and counsel patients and families

Unit-6 70 Hours

Operation theatre

Scrubbing, gowning, gloving Identify instruments, suturing materials for common operations Disinfection, Carbolization, fumigation Preparation of instrument sets for common operations Sterilization of sharps and other instruments Prepare the OT table depending upon the operation Positioning and monitoring of patients

Endotracheal intubation Assisting in minor and major operations. Handling specimens Disposal of waste as per the guidelines

Unit-7 5 Hours

ICU,CCU, CARDIAC OT.

Assist in arterial puncture for blood gas analysis.Perform ECG and interpret accordingly.Conduct and analysis pulse oximetry.Care with artificial airway.Assist in endotracheal intubation.Setting up ventilator,Giving care in ventilator.

This practical experience is designed for students to apply the principles of prevention, promotion and maintenance of health by educating individuals, families and community. This practical exposure will also provide students a base to participate in different health clinics and practice primary health care at primary health centre and in community setting.

Course Outcomes

CO1	Build and maintain rapport with the health care team in the community
CO2	Identify demographic characteristics, health determinants and community health resources.
CO3	Diagnose health needs of individuals, families and community by conducting survey and plan
	health care activities.
CO4	Provide primary health care in primary health centers, sub centers and MCH centers and
	community hospitals and also educate people about healthy life style for health promotions.

Course Objectives:

- 1. To enable students gain knowledge etiology, clinical manifestations for managing patient with eye and ENT disorders.
- 2. To enable students to understand neurological disorders and their management.
- 3. To enable students to understand the concept of female reproductive system & concepts of reproductive health and family welfare programme and manage patients with disorders of reproductive system.
- 4. To enable students to provide nursing care of patients with Burns, reconstructive surgeries and various types of malignancies & various geriatric conditions.
- 5. To enable students to help patients in emergency, critical care units and disaster situations.
- 6. To enable students to apply knowledge of medical surgical using in providing patient care in the hospital and community settings with all the conditions.

Course Outcomes

CO1	Explain and identify etiology, pathophysiology, clinical manifestations, diagnostic measures, management and prevention of complications of adult patients suffering with various medical disease conditions
CO2	Explain and identify etiology, pathophysiology, clinical manifestations, diagnostic measures, management and prevention of complications of adult patients suffering with various surgical conditions
CO3	Describe and identify the concepts, needs, problems (physical, social, economical, psychological, and spiritual) of elderly and role of nurse and society in taking care of elderly patient.
CO4	Describe the role of nurse in disaster management and management of common emergency conditions in hospital and community settings.
CO5	Demonstrate the organization set up of critical care unit and role of nurse in managing critically ill patients

CO6

Describe and identify the occupational and industrial health problems of workers and role of nurse in managing these disease conditions.

- 4. Carpenito Nursing Care Plans & Documentation Carlpenito Nursing Diagnosis ,2009,LWW

Unit-1 Nursing management of Patient with disorders of Ear Nose and T Hoursoat 15 Hours

Review of anatomy and physiology of the Ear Nose and T Hoursoat, Nursing Assessment-History and Physical assessment, Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical & surgical nursing management of Ear Nose and T Hoursoat disorders: External ear: deformities otalgia, foreign bodies, and tumors Middle Ear- Impacted wax, Tympanic membrane perforation, otitis media, otosclerosis, mastoiditis, tumours, Inner ear- Meniere's Disease, labyrinthitis, ototoxicity, tumors, Upper airway infections — Common cold, sinusitis, ethinitis, rhinitis, pharyngitis, tonsillitis and adenoiditis, peritonsilar abscess, laryngitis Upper respiratory airway —epistaxis, Nasal obstruction, laryngeal, obstruction, cancer of the larynx-Cancer of the oral cavity, Speech defects and speech therapy, Deafness -Prevention, control and rehabilitation Hearing Aids, implanted hearing devices Special therapies nursing procedures Drugs used in treatment of disorders of Ear Nose and T Hoursoat Role of nurse Communicating with hearing impaired and muteness

Unit-2 Nursing management of patient with eye disorders 15 HOURS

Review of anatomy and physiology of the eye-Nursing Assessment-History and Physical assessment, Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities, medical & surgical management of eye disorders, Refractive errors, Eyelids-infection, tumours and deformities, Conjunctiva- inflammation and infection, bleeding, Cornea- inflammation and infection, Lens-Cataracts, Glaucoma, Disorder of the urinary tract, Ocular tumours, Disorders of posterior chamber and retina: Retinal and vitreous problems, Retinal detachment, Ocular emergencies and their prevention Blindness National blindness control. Program Eye Banking, Eye prostheses and Rehabilitation Role of a nurse Communication with visually impaired Patient, Eye camps Special therapies Nursing procedures Drugs used in treatment of disorders of eye.

Unit-3 Nursing management of patient with neurological disorder 16 Hours

Review of anatomy and physiology of the neurological system: Nursing Assessment-History and Physical and neurological assessment and Glasgow coma scale • Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical & surgical nursing management of neurological disorders, Congenital malformations, Headache Head Injuries Spinal Injuries: Paraplegia Hemiplegia, Quadraplegia, Spinal cord compression herniation of intervertebral disc, Tumors of the brain & spinal cord Intra cranial and cerebral aneurysms Infections: Meningitis, Encephalitis, Brain abscess, neurocysticercosis, Movement disorders: Chorea Seizures, Epilepsies Cerebro Vascular Accidents (CVA) Cranial, Spinal Neuropathies — Bell's palsy, trigeminal neuralgia, Peripheral Neuropathies; Guillain Barr'e Syndrome Myasthenia gravis Multiple sclerosis Degenerative diseases Delirium, Dementia Alzheimer's disease - Parkinson's disease, Management of unconscious, patients and patients with stroke • Role of the nurse in communicating with patient having neurological deficit, Rehabilitation of patients with neurological deficit, Role of nurse in long stay facility (institutions) and at home Special therapies Nursing procedures Drugs used in treatment of neurological disorders.

Unit-4 Nursing management of patients with disorders of female reproductive system 16 Hours

Review of anatomy and physiology of the female reproductive system Nursing Assessment-History and Physical assessment Breast Self Examination Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical & surgical nursing management disorder of female reproductive system Congenital abnormalities of female reproductive system, Sexuality and Reproductive Health Sexual Health Assessment Menstrual Disorders; Dysmenorrhea, Amenorrhea, Premenstrual Syndrome Abnormal Uterine Bleeding; Menorrhagia, Metrorrhagia Pelvic Inflammatory Disease-Ovarian and fallopian tube disorders; infections, cysts, tumours Uterine and cervical disorders; Endometriosis, polyps, Fibroids, Cervical and uterine tumours, uterine displacement, Cystocele/Uret HoursocelelRectocele Vaginal disorders; Infections Discharges, Fistu las, Vulvur disorders; Infections, cysts, tumours Diseases of breasts; Deformities, Infections, Cysts and Tumours, Menopause and Hormonal, Replacement Therapy • Infertility, Contraception; Types Methods, Risk and effectiveness Spacing Methods, Barrier methods, Intra Conceptional Methods, Terminal methods, Sterilization, Uterine Devices, Hormonal, Post Emergency Contraception methods • Abortion -Natural, Medical and surgical abortion - MTP Act, Toxic Shock Syndrome, Injuries and Trauma; Sexual violences, Special therapies Nursing procedures Drugs used in treatment of gynaecological disorders, National family welfare programme etc.

Unit-5 Nursing management of patients with Burns, reconstructive and cosmetic surgery 10 HOURS

Review of anatomy and physiology of the skin and connective tissues and various deformities, Nursing Assessment-History and Physical assessment and Assessment of burns and fluid and electrolyte loss, Etiology, Classification, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical & surgical nursing management of Burns and Re-constructive and Cosmetic surgery; Types of Re-constructive and Cosmetic surgery; for burns, congenital deformities, injuries and cosmetic purposes Role of Nurse Legal aspects Rehabilitation Special therapies Psycho social aspects of nursing aspects Nursing procedures, Drugs used in treatment of Burns reconstructive and cosmetic surgery

UNIT-6Nursing management of patients with oncological conditions 10 HOURS

Structure & characteristics of normal & cancer cells Nursing Assessment-History and Physical assessment Prevention, Screening, Early detection, Warning signs of cancer • Epidemiology, Etiology, Classification, Pathophysiology, Staging, clinical manifestations, diagnosis, treatment modalities and medical & surgical nursing management of oncological conditions, Common malignancies of various body systems; Oral, larynx, lung, Stomach and Colon, Liver, Leukemias and lymphomas, Breast, Cervix, Ovary, Uterus, Sarcoma, Brain, Renal, Bladder, Prostate etc Oncological emergences, Modalities of treatment Immunotherapy, Chemotherapy Radiotherapy, Surgical Interventions Stem cell and Bone marrow transplants Gene therapy Other forms of treatment, Psychosocial aspects of cancer. • Rehabilitation, Palliative care Symptom and Pain Management, Nutritional support, Home care, Hospice care Stoma Therapy, Special therapies Psychosocial aspects • Nursing procedures

UNIT-7 Nursing management of patient in EMERGENCY & DISASTER situations Disaster Nursing 10 HOURS

Concepts and principles of Disaster Nursing: Causes and Types of Disaster: Natural and Man-made Earthquakes, Floods, Epidemics, Cyclones, Fire, Explosion, Accidents Violence, Terrorism; biochemical, War Policies related to emergency/disaster management; International, national, state, institutional Disaster preparedness: Team, Guidelines, protocols, Equipments ,Resources Coordination and involvement of; Community, various govt. departments, non-Government. organizations and International agencies Role of nurse: working Legal Aspects of Disaster Nursing Impact on Health and after effects; Post Traumatic Stress Disorder Rehabilitation; physical, psychosocial, Financial, Relocation, Emergency Nursing Concept, priorities, principles and Scope of emergency nursing Organization of emergency services: physical setup, staffing, equipment and supplies, protocols, Concepts of triage and role of triage nurse Coordination and involvement of different departments and facilities Nursing Assessment-History and Physical assessment Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical & surgical nursing management of patient with medical and surgical Emergency Principles of emergency management Common Emergencies; Respiratory Emergencies Cardiac Emergencies Shock and Hemorrhage Pain Poly-Trauma, road accidents, crush injuries, wound Bites Poisoning; Food, Gas, Drugs & chemical poisoning Seizures Thermal Emergencies; Heat stroke & Cold injuries Pediatric Emergencies Psychiatric Emergencies Obstetrical Emergencies Violence, Abuse, Sexual assault Cardio Pulmonary Resuscitation Crisis Intervention, Role of the nurse; Communication and Inter Personal Relations, Medico-Legal Aspects,

UNIT-8 Nursing care of the elderly 10 HOURS

Nursing Assessment-History and Physical assessment Aging; Demography; Myths and realities • Concepts and theories of aging Cognitive Aspects of Aging Normal biological aging Age related body systems changes Psychosocial Aspects of Aging Medications and elderly Stress & coping in older adults Common Health Problems & Nursing Management; Cardiovascular, Respiratory, Musculoskeletal, Endocrine, genito-urinary, gastrointestinal Neurological, Skin and other Sensory organs Psychosocial and Sexual c Abuse of elderly, Role of nurse for care of elderly: ambulation, nutritional, communicational, psychosocial and spiritual, Role of nurse for caregivers of elderly Role of family and formal and non-formal caregivers Use of aids and prosthesis (hearing aids, dentures, Legal & Ethical Issues Provisions and Programmes for elderly; privileges, Community Programs and health services; Home and institutional care.

UNIT-9 Nursing management of patient in critical care units 10 Hours

Nursing Assessment-History and Physical assessment Classification, Principles of critical care nursing • Organization; Physical setup, Policies, staffing norms, Protocols, equipment and supplies • Special equipments; ventilators, cardiac monitors, defibrillator, Resuscitation equipments, Infection Control Protocols, Nursing management of critically ill patient; Monitoring of critically ill patient CPR-Advance Cardiac Life support Treatments and procedures. Transitional care, Ethical and Legal Aspects Communication with patient and family Intensive care records Crisis Intervention Death and Dying-coping with Drugs used in critical care unit

UNIT-10 Nursing management of patients adults including elderly with Occupational and Industrial Disorders 8 Hours

Nursing Assessment-History and Physical assessment Etiology, Pathophysiology, clinical manifestations, diagnosis, diagnosis, treatment modalities and medical & surgical nursing management of occupational and industrial health disorders Role of nurse Special therapies, alternative therapies Nursing procedures Drugs used in treatment of Occupational and Industrial disorders

- 1. To enable students to learn the modern concept of child care, its principles national policies, programs.
- **2.** To enable students to identify the needs of children at different ages, monitor growth & development of children at different ages and appreciate role of nurse.
- **3.** To apply knowledge in providing care to normal and high risk neonates, perform neonatal resuscitation and manage common neonatal problems.
- **4.** To enable students to acquire knowledge of nursing management of common childhood disorders and behavioural and social problems in children.

Course Outcomes

CO1	Describe the latest trends and challenges in child health care.
CO2	Identify growth and development, nutritional and psychological needs of children at different age groups and appreciate the preventive measure to be taken concerning child related illness.
CO3	Identify and differentiate between normal and sick neonates and provide nursing care as per the module of IMNCI as provided by INC.
CO4	Identify and demonstrate promotive, preventive, curative and rehabilitative measures for childhood disease and problems.
CO5	Identify and manage a child with behavioral and social problems, educate and counsel parents and make timely referral for child welfare services.

Text Book (s)

- 4. Potts Pediatric Nursing ,2007, Thomson Learning.

Unit-1 Introduction Modern concepts of childcare

15 Hours

Internationally accepted rights of the Child, National policy and legislation in relation to child health and welfare, National programmes related to child health and welfare, Agencies related to welfare services to the children, Changing trends in hospital care, preventive, promotive and curative aspects of child health, Child morbidity and mortality rates, Differences between an adult and child, Hospital environment for a sick child Impact of hospitalization on the child and family, Grief and bereavement, The role of a Child health nurse in caring for a hospitalized child, Principles of pre and post operative, care of infants and children, Child health nursing procedures.

Unit-2 The healthy child

20 Hours

Principles of growth and development, Factors affecting growth & development, growth and development from birth to adolescence, the needs of normal children t Hoursough the stages of development and parental guidance, nutritional needs of children & infants: breast feeding, exclusive breast feeding supplementary/artificial feeding and weaning, baby friendly hospital concept, accidents: causes and prevention, value of play and selection of play material, preventive immunization programme and cold chain, preventive pediatrics, care of under-five & under five clinics/well baby clinics

Unit-3 Nursing care of a neonate

15 Hours

Nursing care of a normal new-born/ Essential new-born care, Neonatal resuscitation, nursing management of low birth weight baby, kangaroo mother care, Nursing management of a low birth baby, nursing management of common neonatal disorders, organization of neonatal unit, Identification & nursing management of common congenital malformations.

Unit-4 Integrated management of neonatal and childhood illnesses (IMNCI) 10 Hours

Integrated management of neonatal and childhood illnesses (IMNCI)

Unit-5 Nursing management in common childhood diseases

20 Hours

Nutritional deficiency disorders, respiratory disorders and infections, gastrointestinal infections, infestations and congenital defects and rheumatic fever, rheumatic heart disease, genitor- urinary disorders; acute glomerulonep Hoursitis, nep Hoursotic syndrome, wilms' tumour, infection & congenital disorders, neurological infections & disorders; convulsions, epilepsy, meningitis, hydrocephalus, spina-bifida, haematological disorders, anaemias, thalassemia, ITP, leukemia, haemophilia, endocrine disorders, juvenile diabetes mellitus, orthopedic disorders: club feet, hip dislocation and fracture, disorders of skin, eye, and ears, common communicable diseases in children, their identification, nursing management in hospital, home and pr.evention,

Child health emergencies: poisoning, foreign bodies, haemorrhage, burns and drowning, nursing care of infant and children with HIV/AIDS

Unit 6- Management of behavioural & social problems in children

10 Hours

Management of common behavioural disorders, management of common psychiatric problems, management of challenged children: mentally, physically & socially challenged, welfare services for challenged children in India, child guidance clinics

Internal Assessment (IA)	Mid Term Exam (MTE1+MTE 2)	End Term Exam (ETE)	Total Marks

- 1. To enable students to acquire knowledge of concepts, Historical trends dimensions, Principles and determinates of Mental Health Nursing
- 2. To enable student to define various terms and classification used in Mental Health Nursing
- 3. To explain Student about the and psycho dynamics of maladaptive behaviour
- **4.** To make Student Learn about nature, purpose and process of assessment of mental health status Examination
- 5. To enable student to learn and define various therapeutic communication technique
- **6.** To explain Student about treatment modalities and therapies used in mental disorders and role of the nurse
- 7. To enable Students to describe the etiology, psychopathology, clinical manifestations, diagnostic criteria and management of patients with Schizop Hoursenia and other psychotic disorders
- **8.** To enable student to learn describe the etiology, psycho- pathology, clinical manifestations, diagnostic criteria and management of mood disorder
- **9.** To Enable student to describe the etiology, psycho- pathology, clinical manifestations, diagnostic criteria and management of patients with neurotic, stress related and somatization disorders
- **10.** To make student acquire learning about in details of Substance abuse, Eating, Sexual and personality disorder
- **11.** To enable student to acquire brief knowledge of Childhood and Adolescent disorders including mental deficiency
- **12.** To make student aware about identification of psychiatric emergencies, Legal aspects(Various laws) and Community mental health nursing

Course Outcomes

CO1	Describe historical development, latest trends, epidemiology, scope, legal & ethical issues in psychiatric nursing & role of nurse in caring for mentally ill patients in the hospital and community setting.
CO2	Define various terms used in mental health nursing and describe principles, classification, etiological factors, psychopathology, conceptual models and standards of mental health nursing practice.
СОЗ	Differentiate between neurotic and psychotic mental and organic brain syndrome &describe the etiology, psychopathology, signs and symptoms, medical management of all psychotic and neurotic disorder and Mood disorder
CO4	Assess mental health status of mentally ill patient and provide nursing care based on the status
CO5	Identify therapeutic communication techniques, nurse patient relationship and provide therapeutic intervention and treatment modalities for mental disorders
CO6	Identify psychiatric emergencies and role of nurse in crisis intervention management referral with hospital and community center
CO7	Explain treatment modalities and therapies used in mental disorders and role of the nurse
CO8	Describe the etiology, psychopathology, clinical manifestations, diagnostic criteria and management of patients with substance use disorders.
CO9	Describe the etiology, psychopathology, clinical manifestations, diagnostic criteria and management of childhood and adolescent disorders including mental deficiency
CO10	Describe the model of preventive psychiatry, Legal psychiatry and community mental health services and role of nurse.

Text Book (s)

- 1. Townsend Psychiatric Mental Health Nursing, 2007. F.A. Davis
- 2. Stuart Principles & Practice of Psychiatric Nursing,2008,Elsevier

Reference Book (s)

- 1. Sreevani Psychiatric Mental Health Nursing, 2008, Jaypee
- 2. Shives Basic Concepts in Psychiatric Mental Health Nursing, 2007, LWW
- 3. KP Neeraja, Mental Health Nursing, 2006 Potts
- 4. Kappor Bimla, Mental Health Nursing, 2006

Course Content:

Unit-1 Introduction 5 Hours

- Perspectives of Mental Health and Mental Health nursing: evolution of mental health services, treatments and nursing practices. Prevalence and incidence of mental health problems and disorders.
- Mental Health Act
- National Mental health policy vis a vis National Health Policy National Mental Health programme
- Mental health team
- Nature and scope of mental health nursing
- Role and functions of mental health nurse in various settings and factors affecting the level of nursing practice
- Concepts of normal and abnormal behaviour

Unit 2- Principles and Concepts of Mental Health Nursing

5 Hours

- Definition: mental health nursing and terminology used Classification of mental disorders:
- 1CD Review of personality development, defense mechanisms
- Maladaptive behaviour of
- individuals and groups: stress, crisis and disaster(s)
- Etiology: bio- psycho-social factors Psychopathology of mental disorders: review of structure and function of brain, limbic system arid abnormal neuro transmission Principles of Mental health Nursing Standards of Mental health Nursing practice
- Conceptual models and the role of nurse: Existential Model
- Psycho-analytical models
- Behavioural model Interpersonal model

Unit-3 Assessment of mental health status

08 Hours

- History taking
- Mental status examination
- Mini mental status examination
- Neurological examination:

Review Investigations: Related Blood

chemistry, EEG, CT & MRI • Psychological tests Role and responsibilities of nurse

Unit-4 Therapeutic communication and nurse-patient relationship

06 Hours

Therapeutic communication:

Types, techniques, characteristics

Types of relationship,

Ethics and responsibilities

Elements of nurse patient contract

Review of technique of IPR-Johari

Window

Goals, phases, tasks, therapeutic techniques

Therapeutic impasse and its

Unit-5 Treatment modalities and therapies used in mental disorders

- Psycho Pharmacology
- Psychological therapies: Therapeutic community, psycho therapy-Individual: psycho-analytical, cognitive and supportive, Family, Group, Behavioural, Play, Psycho-drama, Music, Dance, Recreational and Light therapy, Relaxation therapies: Yoga, Meditation, bio feedback
- Alternative systems of medicine
- Occupational therapy Physical Therapy: electro convulsive therapy Geriatric considerations

Role of nurse in above therapies

Unit 6- Nursing management of patient with Schizop Hoursenia, and other psychotic disorders 05 Hours

Classification: 1CD

Etiology, psycho-pathology, types, clinical manifestations, diagnosis

Nursing Assessment-History,

Physical and mental assessment

Treatment modalities and nursing management of patients with Schizop Hoursenia and other psychotic disorders

Geriatric considerations

Follow-up and home care and

Rehabilitation

Unit 7- Nursing management of patient with mood disorders

05 Hours

- Mood disorders: Bipolar affective disorder, Mania depression and dysthamia etc
- Etiology, psycho-pathology, clinical manifestations, diagnosis,

Nursing Assessment-History, Physical and mental assessment

Unit 8- Nursing management of patient with neurotic, stress related and somatization disorders

8 Hours

- Anxiety disorder, Phobias, Dissociation and Conversion disorder, Obsessive compulsive disorder, somatoform disorders, Post traumatic stress disorder
- Etiology, psycho-pathology, clinical manifestations, diagnosis Nursing Assessment-History, Physical and mental assessment
- Treatment modalities and nursing management of patients with neurotic, stress related and somatization disorders Geriatric considerations Follow-up and home care and rehabilitation

Unit 9- Nursing management of patient with Substance use disorders

5 Hours

Commonly, used psychotropic substance: Classification, forms, routes, action, intoxication and withdrawal Etiology of dependence:

tolerance, psychological and physical dependence, withdrawal syndrome, diagnosis,

Nursing Assessment-History, Physical, mental assessment and drug assay.

Treatment (detoxification, anti abuse and narcotic antagonist therapy and harm reduction) and nursing management of patients with substance use disorders Geriatric considerations

Follow-tip and home care and rehabilitation

Unit 10- Nursing management of patient with Personality, Sexual and Eating disorders

- Classification of disorders Etiology, psycho-pathology, characteristics, diagnosis, Nursing Assessment-History, Physical and mental assessment
- Treatment modalities and nursing management of patients with Personality, Sexual and Eating disorders
- Geriatric considerations

Follow-up and home care and rehabilitation

Unit 11- Nursing management of childhood and adolescent disorders including mental deficiency 06 Hours

Classification Etiology, psychopathology, characteristics, diagnosis Nursing Assessment-History, Physical, mental and IQ assessment

Treatment modalities and nursing management of childhood disorders including mental deficiency Follow-up and home care and rehabilitation

Unit 12- Nursing management of organic brain disorders

05 Hours

Classification: ICD?

- Etiology, psycho-pathology, clinical features, diagnosis and Differential diagnosis (parkinsons and alzheimers)
- Nursing Assessment-Flistory, Physical, mental and neurological assessment Treatment modalities and nursing management of organic brain disorders • Geriatric considerations

Follow-up and home care and

Unit 13- Psychiatric emergencies and crisis intervention

06 Hours

Types of psychiatric emergencies and their management

Stress adaptation Model: stress and stressor, coping, resources and mechanism

Grief: Theories of grieving process, principles, techniques of counseling Types of crisis Crisis

Intervention:

Principles, Techniques and Process

Geriatric considerations Role and responsibilities of nurse

Unit 14- Legal issues in Mental Health Nursing

04 Hours

- The Mental Health Act 1987: Act, Sections, Articles and their implications etc.
- Indian Lunacy Act.1912
- Rights of mentally ill clients
- Forensic psychiatry
- Acts related to narcotic and psychotropic substances and illegal drug trafficking Admission and discharge procedures

Role and responsibilities of nurse

Unit 15- Community Mental Health Nursing

- Development of Community Mental Health Services:
- National Mental Health Programme

Institutionalization Versus

Deinstitutionalization • Model of Preventive psychiatry: Levels of

Prevention

Mental Health Services available at the primary

secondary, tertiary levels including rehabilitation and

Role of nurse

• Mental Health Agencies:

Government and voluntary,

National and International • Mental health nursing issues for special populations:

Children, Adolescence, Women, Elderly, Victims of violence and abuse, Handicapped, HIV /AIDS etc.

` /	Mid Term Exam (MTE1+MTE 2)	End Term Exam (ETE) Total Marks	Total Marks
15	05+05	75	100

Name of The Course	Midwifery and Obstetrical Nursing				
Course Code	BSCN3004				
Prerequisite	Knowledge regarding anatomy and physiology of reproductive system				
Corequisite	Maternal and child health nursing lab with dummy, Stimulators ,charts, log book, group project, Video film, Models				
Antirequisite	NA

		2	0	0	2

- **1.** To enable students to acquire knowledge of anatomy and physiology of female reproductive system.
- 2. To enable students to acquire knowledge of normal pregnancy and its management.
- 3. To understand the physiology and management of stages of labour and puerperium
- 4. To apply knowledge of midwifery and obstetrics nursing in care of patient at hospital and community settings

Course Outcomes

CO1	Acquire knowledge regarding male and female reproductive system so as to understand the concept of midwifery and obstetrics nursing.
CO2	Recognize new trends and challenges in midwifery and obstetrics nursing
CO3	Demonstrate diagnosis and management of women during antenatal, intranatal and postnatal period of pregnancy and labor
CO4	Demonstrate assessment and management of normal new born baby in the hospital and community setting.

Text Book (s): 1. Myles. "Text book for midwives".7th edition 2004; Churchill livingstone.

2. D.C.Dutta. Text book of Obstetrics. 6 th edition 2004; New central book agency.

Reference Book (s): 1. Orshan – Maternity Nursing ,2009,LWW

- 2. Ricci Essentials of maternity nursing, 2009, Lippincotts
- 3. William's Obstetrics, 2009, Mcgrahill
- **4.** Lowdermilk Maternity Nursing, 2008, Elsevier

Course Content:

Unit-1 Introduction 5 Hours

Introduction to concepts of midwifery and obstetrical nursing, Trends in midwifery and obstetrical nursing, Historical perspectives and current trends, Legal and ethical aspects, preconception care and preparing for parenthood, Role of nurse in midwifery and obstetrical nursing, National policy and legislation in relation to maternal health and welfare, Maternal morbidity, mortality and fertility rates, perinatal morbidity and mortality rates.

Unit-2 10 Hours

Anatomy and physiology of female reproductive system and foetal development

Female pelvis — general description of the bones joints, ligaments planes of the pelvis diameters of the true pelvis, important landmarks, variations in pelvis shape. Female organs of reproduction - external genitalia, internal genital organs and their anatomical □relations, musculature — blood- supply, nerves, lymphatics, pelvic cellular, tissue, pelvic peritoneum., Physiology of menstrual cycle, Human sexuality, Foetal development, Conception. Review of fertilization; implantation (embedding of the ovum), development of the embryo and placenta at term — functions, abnormalities, the foetal sac, amniotic fluid, the umbilical cord foetal circulation, foetal skull, bones, sutures and measurements. Review of Genetic

Unit-3 10 Hours

Assessment and management of pregnancy (ante-natal)

- Normal pregnancy
- Physiological changes during

Pregnancy, Reproductive system, Cardio vascular system, Respiratory system, Urinary system, Gastro intestinal system, Metabolic changes, Skeletal changes, Skin changes, Endocrine system, Psychological changes, Discomforts of pregnancy, Diagnosis of pregnancy, Signs, Differential diagnosis, Confirmatory tests, Ante-natal care C Objectives, Assessment, History and physical examination, Antenatal Examination, Signs of previous child-birth, Relationship of foetus to uterus and pelvis: Lie, Attitude, Presentation, Position

- Per vaginal examination.
- Screening and assessment for high risk; Risk approach, History and Physical Examination, Modalities of diagnosis; Invasive & Non-Invasive, ultrasonic, cardio tomography, NST, CST
- Antenatal preparation, Antenatal counseling, Antenatal exercises Q Diet, Substance use, Education for child-birth, Husband and families, Preparation for safe-confinement, Prevention from radiation, Psycho-social and cultural, aspects of pregnancy, Adjustment to pregnancy, Unwed mother, Single parent, Teenage pregnancy, Sexual violence
- Adoption

Unit-4 12 Hours

Assessment and management of intra-natal period

- Physiology of labour, mechanism of labour, Management of labor. First stage: Signs and symptoms of onset of labour; normal and abnormal, Duration, Preparation of: Labour room, Woman, Assessment and observation of women in labour; partogram-maternal and foetal monitoring, Active management of labour, Induction of labour
- Second stage:, Signs and symptoms; normal and abnormal, Duration, Conduct of delivery; Principles and techniques in relief and comfort in labour, Episiotomy (only if required), Receiving the new born
- Neonatal resuscitation; initial steps and subsequent resuscitation, Care of umbilical cord, Immediate assessment including screening for congenital anomalies, Identification, Bonding, Initiate feeding, Screening and transportation of the neonate
- Third stage: Signs and symptoms; normal

and abnormal, Duration, Method of placental expulsion, Management; Principles and techniques. Examination of the placenta, Examination of perineum, Maintaining records and reports, Fourth Stage

Unit-5 15 Hours

Assessment and management of women during post natal period

Normal puerperium; Physiology, Duration

Postnatal assessment and management

Promoting physical and emotional well-being

Lactation management and Immunization

Family dynamics after child-birth, Family welfare services; methods, counseling, Follow-up Records and reports

Unit-6 10 Hours

Assessment and management of normal neonates

Normal Neonate; Physiological adaptation, Initial & Daily assessment, Essential newborn care; Thermal control, Breast feeding, prevention of infections, Immunization, Minor disorders of newborn and its management

Levels of Neonatal care (level I,II, & III) ,At primary, secondary and tertiary levels, Maintenance of Reports and Records

Internal Assessment (IA)	Mid Term Exam (MTE1 + MTE 2)	End Term Exam (ETE)	Total Marks
15	(5+5=10)	75	100

Name of The Course	Nursing research and statistics
--------------------	---------------------------------

Course Code	BSCN3005				
Prerequisite	10+2 with PCB 55%				
Corequisite	Nursing research and statistics books				
Antirequisite	NA

		2	0	0	2

- 1. To enable students to understand the importance of research in nursing.
- 2. To enable the students to apply concepts of research in nursing.
- 3. To identify various sources of review of literature.
- 4. To explain the use of statistics, scales of measurement and graphical presentation.

Course Outcomes

CO1	Describe the concept, terminology, and steps used in nursing research process.
CO2	Identify research problem, state objectives and review the related literature.
CO3	Describe research approaches, design, sampling and Data collection techniques.
CO4	Analyze, Interpret and summarize the data by using descriptive and inferential statistics.
CO5	Communicate and utilize the research findings in Nursing Practice, education and administration.

Text Book (s):

- 1. Mrs Sunanda S Roy Choudhary "Textbook of nursing research" 1st edition ,KPH publishers
- 2. BT Basavanthappa "Essentials of nursing research" jaypee publishers
- 3. Prof Arun Kumar Jindal "Nursing research and statistics" KPH publishers

Reference Book (s):

- 1. Denise F Polit "Essential of nursing research" 8th edition, Lippincott publishers.
- 2. Suresh K Sharma "Nursing Research and statistics" 2nd edition, Elsevier publishers
- 3. Elizabeth heavey "statistics for nursing "1st edition, Lippincott publishers.

Unit-1 Research and research process

5 Hours

- Introduction and need for nursing research
- Definition of Research & nursing research
- Steps of scientific method
- Characteristics of good research
- Steps of Research process overview

Unit-2 Research Problem Question

4 Hours

Identification of problem area

- Problem statement
- Criteria of a good research problem.
- Writing objectives

Unit-3 Review of literature

4 Hours

- Location
- Sources
- On line search; CINHAL, COC HOURSANE etc
- Purposes
- Method of review

Unit-4 Qualitative and Quantitative designs

6 Hours

Unit-5 Sampling and data collection

8 Hours

- Definition of Population, Sample, Sampling criteria, factors influencing sampling process, types of sampling techniques.
- Data- why, what, from whom, when and where to collect.
- Data collection methods and instruments:

Methods of data collection, Questioning, interviewing, Observations, record analysis and measurement, Types of instruments, Validity & Reliability of the Instrument, Pilot study, Data collection procedure

Unit-6 Analysis of data

4 hour

Compilation, Tabulation, classification, summarization, presentation, interpretation of data

Unit-7 Introduction to statistics

- Definition, use of statistics, scales of measurement.
- Frequency distribution and graphical presentation of data
- Mean, Median, Mode, Standard deviation
- Normal Probability and tests of significance
- Co-efficient of correlation.
- Statistical packages and its application

Unit-8 Communication and utilization of research

4 Hours

Communication of research findings

Verbal report

Writing research report

• Writing scientific article/paper ,Critique review of published research ,utilization of research findings

Internal Assessment (IA)	Mid Term Exam (MTE1 + MTE 2)	End Term Exam (ETE)	Total Marks
15	(5+5=10)	75	100

- 1. Describe scope and importance of Environmental studies.
- 2. Describe renewable and non-renewable resources of Environmental Studies.
- 3. Describe the concept and functions of ecosystem
- 4. Describe ecosystem diversity and conservation of biodiversity
- 5. Describe causes, effects and measures of environmental pollutions
- 6. Describe social issues affecting environmental health and acts for maintaining environment
- 7. Describe Population growth and its effects on environment

Course Outcomes

CO1	Introduce multidisciplinary nature of environment studies and need for public awareness.
CO2	Demonstrate natural resources and role of society and uses conservation of natural resources for sustaining life.
CO3	Appreciate the concept, structure function of ecosystem and biodiversity role of society in conserving biodiversity at global, natural and local level.
CO4	Describe various kinds and causes of environment pollution and role of society in preventing free environment.
CO5	Identify social issues pertaining the environment and impact of population explosion on environment and human health.

Text Book (s)

Course Content:

Unit-1 Multidisciplinary Nature of environmental studies. Definition, Scope and importance, Need for public awareness Unit-2Natural resources Renewable and nonrenewable resources. 7 Hours

Natural resources and associated problems,

Forest resources: Use and over-exploration, deforestation and case studies .Timber extraction, Timber extraction, mining, dams and their effects on forest and tribal people,

Water resources: Use and Over utilization of surface and ground water, floods, droughts, conflicts over water, dam benefits and problems,

Mineral resources: use and exploitation ,environmental effects of extracting and using mineral resources and case studies,

Food resources: world food problems ,changes caused by agriculture and over , grazing ,effects of modern agriculture , fertilizer, pesticide problems , water logging ,salinity , case studies,

Energy resources: growing energy needs renewable and nonrenewable energy resources, use of alternate energy sources, case studies,

Land resources: land as a resources land degradation , man induced landslides soil erosion , and desertification,

Role of an individual in the conservation of natural resources,

Equitable use of resources for sustainable lifestyles.

Unit-3 Ecosystems 5 Hours

Concept of an ecosystem, Structure and function of an ecosystem, Producers ,consumers and decomposers, Energy flow in ecosystem, Ecological succession, Food chains, food webs and ecological pyramids, Introduction , types ,characteristic feature Structure and function of the following Ecosystems: Forest ecosystem Grassland ecosystem desert ecosystemaquatic ecosystem (ponds ,stream ,lake rivers oceans ,estuaries

Unit-4 Biodiversity and Its Conservation

8 Hours

Introduction-definition, genetic, species and ecosystem diversity, Bio geographical classification of India. Value of biodiversity: consumptive use. productive use, social, ethical, aesthetic and option values, Biodiversity at global, national and local LevelIndia as a mega-diversity nation, Hot-spots of bi diversity, T Hourseats to bio diversity: habit loss, poaching of wildlife, man-wildlife conflicts, Endangered and endemic species of India, Conservation of biodiversity: in –situ and Ex-situ conservation of biodiversity

Unit-5 Environmental Pollution

8 Hours

Definition, Causes, effects and control measures of: Air pollution, Soil pollution, Marine pollution, Noise pollution, Thermal pollution, Nuclear pollution Solid waste management: causes, effects and control measures of urban and industrial waste Role of an individual in the prevention of pollution, Pollution case studies Disaster management: flood, earthquakes, cyclones and land slides

Unit-6 Social issues and the Environment.

10 Hours

From unsustainable to sustainable development. Urban problems related to energy, Water conservations, rain water harvesting, water shed management, Resettlement and rehabilitation of people. Its problems and concerns .case study. Environmental ethics: issues and possible solutions. Climate changes, global warming, acid rain, ozone layer depletion, nuclear accident, and hole cast. Case studies, Waste land reclamation. Consumerism and waste product.

Environmental protection act. Air (prevention and control of pollution) act. Water (prevention and control of pollution) Act, Wild life protection act, Forest conservation act Issues involved in the enforcement of environmental legislation, Public awareness

Unit -7 Human population and the environment

5 Hours

Population growth, variation among nations, Population explosion-family welfare program, Environmental and human health. Human rights. Value education. HIV/AIDS Women and child welfare. Role of information technology in environment human health

- 1. To enable students to provide nursing care to adult patients with various medical & surgical disorders.
- 2. To enable students in providing care to patients suffering from occupational disorders.
- 3. To enable students to identify various instruments used in common operations
- 4. To enable students to participate in infection control practices in the operation theatre.
- **5.** To enable students to provide care to geriatric patients

Course Outcomes

CO1	Develop skills to provide nursing care to adult patients with medical and surgical conditions concerning all systems of human body and prepare patient and family for home care.
CO2	Perform assessment and examination and assist with therapeutic procedure in all medical and surgical conditions, related to all systems of the human body.
СОЗ	Demonstrate advanced nursing procedures to handle, medical and surgical conditions including emergencies during trauma, disaster, war etc
CO4	Develop skills in infection control practices and bio medical waste management to prevent nosocomial infections in the hospital and community settings.

Unit-1 ENT 30 hour

Perform examination of ear, nose and t Hoursoat Assist with diagnostic procedures Assist with therapeutic procedures Instillation of drops Perform/assist with irrigations. Apply ear bandage Perform tracheotomy care Teach patients and families.

Unit-2 Ophthalmology 180 Hour

Perform examination of eye Assist with diagnostic procedures Assist with therapeutic procedures Perform/assist with Irrigations. Apply eye bandage Apply eye drops ointments Assist with foreign body removal. Teach patients and families.

Unit-3 Neurology 60 Hours

Perform Neurological Examination Use Glasgow coma scale Assist with diagnostic procedures Assist with therapeutic procedures Teach patients & families Participate in rehabilitation program.

Unit-4 Gynecology ward

30 Hours

Assist with gynecological Examination Assist with diagnostic procedures: Assist with therapeutic Procedures Teach patients families Teaching self Breast Examination.

Assist with PAP smear collection.

Unit-5 Burns Unit 25 Hours

Assessment of the burns patient Percentage of burns Degree of burns. Fluid & electrolyte replacement therapy Assess Calculate Replace Record intake/output Care of Burn wounds Bathing Practice medical & Dressing Perform active & passive exercises surgical asepsis Counsel & Teach patients and families Participate in rehabilitation program.

UNIT-6 Oncology Unit

50 Hours

Screen for common cancers-TNM Classification Assist with diagnostic Procedures Biopsies Pap smear Bone-marrow aspiration Breast examination Assist with therapeutic procedures Participates in various modalities of

Treatment Chemotherapy Radiotherapy Pain management Stoma therapy Hormonal therapy Immunotherapy

• Gene therapy Alternative therapy Participate in palliative care Counsel and teach patients families

UNIT-7 Critical care unit

50 Hours

Assist in arterial puncture for blood gas analysis.Perform ECG and interpret accordingly.Conduct and analysis pulse oximetry.Care with artificial airway.Assist in endotracheal intubation.Setting up ventilator,Giving care in ventilator.

Unit-1 Pediatric Medical ward Pediatric history taking, Physical examination and assessment of children Administer oral, I/M & IV medicine/fluids

- ➤ Calculation of fluid requirements
- > Prepare different strengths of I.V. fluids
- > Apply restraints
- Administer O2 inhalation by different methods
- Give baby bath

- Feed children by katori spoon, etc.
- > Collect specimens for common investigations
- Assist with common diagnostic procedures
- > Teach mothers/parents- malnutrition, oral rehydration therapy, feeding & weaning, Immunization schedule, play therapy, specific disease.

Unit-2 Pediatric Surgery Ward

90 Hours

- Calculate, prepare and administer I/V fluids
- Do bowel wash
- > Care for ostomies- Colostomy irrigation, ureterostomy, gastrostomy, enterostomy
- Urinary catheterization and drainage
- > Feeding
- ➤ Naso-gastric
- **▶** Gastrostomy
- > Jejunostomy
- > Care of surgical wounds- dressing, suture removal.

Unit-3 Pediatric OPD/Immunization room

30 Hours

- Assessment of children- Health assessment, Developmental assessment, ant Hourso pometric assessment
- Immunization
- ➤ Health/Nutritional Education

Unit-4 Pediatric medicine and surgery ICU

60 Hours

- Care of baby in incubator/warmer
- Care of a child on ventilator
- Endotracheal suction
- Chest physiotherapy
- Administer fluids with infusion pump
- Total parenteral nutrition
- Phototherapy
- Monitoring of babies
- Cardio pulmonary resuscitation

- 1. To enable student to Assess patients with mental health problems ,assist in therapy and council patient and family
- **2.** To enable students to assess children with various mental health problems, council and educate children and their family
- To enable students to provide nursing care for patients with various mental health
 Problems and assist in various in therapy
- **4.** To enable students to identify patients with mental disorders, motivate patients for early treatment and assist for follow up clinics

Course Outcomes

CO1	Develop skills in assessing, observing and assisting patient with various mental health problems & prepare patient and families for home care
CO2	Acquire skills in assessing adult and children's mental health status, assist in various therapies and provide need based care in mental health hospitals, and community.
CO3	Acquire skills in various procedure and therapies used to treat patient with all kinds of mental health problems.
CO4	Identify individual with mental health problem in community setting, organize awareness camps to educate and council family members, patients and community to make timely crisis intervention and referral to nearby health care services.

- 4. Lalitha Psychiatric Mental Health Nursing, VMG Publishers

Unit-1 Psychiatric OPD

(Assess patients with mental health problems

Observe and assist in Therapies Counsel and educate patient, and families)

30 Hours

History taking

Perform mental status examination (MSE)

Assist in Psychometric assessment

Perform Neurological examination

Observe and assist in therapies

Teach patients and family

Unit 2- Child Guidance clinic

(Assessment of children with various mental health problems

Counsel and educate children, families and significant others)

60 Hours

History taking

Assist in psychometric assessment

Observe and assist in various therapies

Teach family and significant others

Unit 3- Inpatient ward 180 Hours

Assess patients with mental health problems To provide nursing care for patients with various mental health problems Assist in various therapies Counsel and educate patients, families and significant

Others-180 Hours

History taking

Perform mental status examination (MSE)

Perform Neurological examination

Assist in psychometric Assessment

Record therapeutic, communication

Administer medications

Assist in Electro- convulsive Therapy (ECT)

Participate in all therapies

Prepare patients for Activities of Daily

Unit 4- Community Psychiatry 30 Hours

To identify' patients with various mental disorders To motivate patients for early treatment and follow up To assist' in follow up clinic Counsel and educate patient, family and community

Conduct case work Identify individuals with mental health problems Assists in mental health camps and clinics Counsel and Teach family members, patients and community

Unit-1 Antenatal clinic/OPD

60 Hours

- Antenatal history taking, Physical examination,
 Recording of Weight & B.P,Hb.& Urine testing for sugar and albumin
- > Antenatal examination-abdomen and breast, Immunization
- ➤ Assessment of risk status, Teaching antenatal mothers
- ➤ Maintenance of Antenatal records

Unit-2 Labour room /OT

150 Hours

- > Assessment of Woman in labour
- > Per vaginal examinations and interpretation
- > Monitoring and caring of woman in labour
- ➤ Maintenance of partograph, Conduct normal delivery
- > Newborn assessment and immediate care
- > Resuscitation of newborns
- > Assessment of risk status of newborn
- > Episiotomy and suturing
- ➤ Maintenance of labour and birth records
- > Arrange for and assist with Cesarean section and care for woman& baby during Cesarean
- > Arrange for and assist with MTP and other surgical procedures

Unit-3 Post natal Ward

120 Hours

- > Examination and assessment of mother and Baby
- > Identification of deviations
- > Care of postnatal mother and baby
- > Perineal care, Lactation. Management, Breast feeding, Babybath
- > Immunization,
- > Teaching postnatal mother:
- > Mother craft
- > Post natal care &Exercises and Immunization

Unit-4 Newborn nursery

70 Hours

- > Newborn assessment: Admission of neonates, Feeding of at neonates, Risk Katori, spoon, paladi, tube feeding, total parenteral nutrition
- Thermal management of neonates, kangaroo mother care, care of baby in incubator
- Monitoring and care of neonates, Administering medications, Intravenous therapy
- > Assisting with diagnostic procedure, Assisting with exchange transfusion
- > Care of baby on ventilator, Phototherapy, Infection control, protocols in the nursery
- Teaching and counseling of parents, Maintenance of Neonatal records

Unit-5 Family planning clinic

30 Hours

- > Counseling technique
- > Insertion of IUD
- > Teaching on use of family planning methods
- Arrange for and Assist with family planning operations
 Maintenance of records and reports

Internal Assessment (IA)	Mid Term Exam (MTE1 + MTE 2)	End Term Exam (ETE)	Total Marks

BSC NURSING 4TH YEAR

Name of The Course	Midwifery and obstetrical nursing			
Course Code	BSCN4001			
Prerequisite	1.Knowledge regarding anatomy and physiology of reproductive system 2.Knowledge regarding normal pregnancy, labour, puerperium and newborn			
Corequisite	Maternal and child health nursing lab with models, dummy, charts, log book, case book			
Antirequisite	NA		1	1
	L	T	P	C
	1.5	5 0	0	1.5

Course Objectives: This course is designed for students to appreciate the concepts and principles of midwifery and obstetrical nursing. It helps them to acquire knowledge and skills in rendering nursing care to normal and high risk pregnant woman during antenatal, natal and post natal periods in hospitals and community settings. It also helps to develop skills in managing normal and high risk neonates and participate in family welfare programme

Course Outcomes

CO1	Describe and identify the management of women with high risk pregnancy during Antenatal, intranatal and postnatal period.
CO2	Demonstrate indications, dosage, action, side effect of drugs used during pregnancy,labor and postnatal period
CO3	Identify and assess high risk neonates and their management
CO4	Appreciate the role of nurse in national family welfare programme and contraceptive methods

3. A Comprehensive Textbook of Midwifery and Gynecological Nursing, Third Edition, by Annama Jacob, JP publisher.

Unit-1 High-risk pregnancy – assessment & management

10 Hours

- Screening and assessment Ultrasonics, cardiotomography, NST, CST, non-invasive &invasive, Newer modalities of diagnosis
- High-risk approach
- Levels of care; primary, secondary and tertiary levels
- Disorders of pregnancy Hyper-emesis gravidarum, bleeding inearly pregnancy, abortion, ectopic
- Pregnancy, vesicular mole, Ante-partum haemorrage
- . •Uterine abnormality and displacement.
- Diseases complicating pregnancy Medical and

surgical conditions - Infections, RTI (STD), UTI, HIV, TORCH - Gynaecological diseases complicating pregnancy , Pregnancy induced hypertension .& diabetes, Toxemia of pregnancy, hydramnios, Rh incompatibility u Mental disorders

- Adolescent pregnancy, Elderly primi andgrand multipara
- Multiple pregnancy , Abnormalities of placenta & cord
- Intra-uterine growt Hoursetardation
- Nursing management of mothers with high-risk pregnancy Maintenance of Records and Report

Unit-2Abnormal Labour – assessment and management

10 Hours

- Disorders in labour CPD and contracted pelvis Malpositions and malpresentations- Premature labour, disorders of uterine actions precipitate labour, prolonged labour
- Complications of third stage: injuries to birth canal
- Obstetrical emergencies and their management; Presentation and prolapse of cord, Vasa praevia, amniotic fluid embolism,rupture of uterus, shoulder dystocia, obstretical shock
- Obstetrical procedures and operations;
- Induction of labour, forceps, vacuum version, manual removal of placenta, cesarean section, destructive operations
- Nursing management of women undergoing Obstetrical operations and procedures

Unit-3 Abnormalities during Postnatal Periods

3 Hours

Assessment and management of woman with postnatal Complications:

Puerperal infections, breast engorgement & infections, t Hoursombo-Embolic disorders, post- partum haemorrage, Eclampsia and subinvolution, Psychological complications:

- Post partum Blues - Post partum Depression - Post partum Psychosis

Unit-4 Assessment and management of High risk newborn

8 Hours

- Admission of neonates in the neonatal intensive care units- protocols Nursing management of-: Low birth weight babies - Infections - Respiratory problems - hemolytic disorders- Birth injuries – Malformations
- Monitoring of high risk neonates
- Feeding of high risk neonates ,Organization and management of neonatal intensive care units ,Infection control in neonatal intensive care units
- Maintenance of reports and records.

Unit-5 Pharmaco-therapeutics in obstetrics

4 Hours

Indication, dosage, action, contra indication and side effects of drugs
Effect of drugs on pregnancy, labour & puerperium, Nursing responsibilities in the
Administration of drug in Obstetrics - oxytocins, antihypertensives, diuretics, tocolytic agents, anti
convulsants; Analgesics and anesthetics in obstetrics. Effects of maternal medication on foetus and
neonate.

Unit-6 Family Welfare Programme

10 Hours

- Population trends and problems in India Concepts, aims, importance and history of family welfare programme National Population: dynamics, policy and education
- •National family welfare programme; RCH, ICDS, MCH. Safe motherhood
- Organization and administration; at national, state, district, block and village levels Methods of contraception; spacing, temporary and permanent, Emergency contraception
- Infertility and its management
- Counseling for family welfare
- Latest research in contraception
- •Maintenance of vital statistics
- Role of national, international and voluntary organizations
- Role of a nurse in family welfare programme, Training / Supervision /Collaboration with other functionaries in community like ANMs. LHVs, Anganwadi workers, TBAs (Traditional birth attendant Dai)

 - 4 Mary Ann Hogan "community health nursing"1st edition, Vango publishers

Course Content:

Unit-1 Introduction	4 Hours

Definition, concept & scope of Community Health and Community Health Nursing

- Historical development of Community health
- Community health Nursing.
- Pre-independence
- Post-independence

Unit-2 Health planning and policies and problems

6 Hours

National health planning in India-Five Year Plans

- Various committees and commissions on health and family welfare
- Central council for health and family welfare (CCH and FW), National health policies (1983,2002)
- National population policy
- Health problems in India

Unit-3 Delivery of community health services

15 Hours

Planning, budgeting and material management of SCs, PHC and,CHC

Rural: Organization, staffing and functions of rural health services provided by government at:

- Village, Sub centre, Primary health centre, Community health center /sub divisional, Hospitals, District, State, Center
- Urban: Organization, staffing and functions of urban health services provided by government at:
- Slums, Dispensaries, Maternal and child health centers, Special Clinics, Hospitals, Corporation / Municipality /Board, Components of health services, Environmental sanitation, Health education, Vital statistics, M.C.H.-antenatal, natal, postnatal, MTP Act, female foeticide act, child adoption act
- Family Welfare, National health programmes, School health services, Occupational health, Defence services, Institutional services, Systems of medicine and health care
- Allopathy, Indian System of Medicine and Homeopathy
- Alternative health care systems like yoga, meditation, social and spiritual healing etc
- Referral system

Unit-4 Community health nursing approaches, concepts and roles and 25 Hours responsibilities of nursing

- Approaches, Nursing theories And Nursing process, Epidemiological approach, Problem solving approach
- Evidence based approach, Empowering people to care for themselves
- Concepts of Primary Health Care:
- Equitable distribution
- Community participation
- Focus on prevention
- Use of appropriate technology
- Multi-sectoral approach
- Roles and responsibilities of Community health nursing personnel in
- Family health services
- Information Education Communication (IEC)
- Management Information System (Mis): Maintenance of Records & reports
- Training arid supervision of various categories of health workers
- National Health Programmes
- Environmental sanitation
- Maternal and child health and Family welfare
- Treatment of Minor ailments
- School Health Services
- Occupational Health
- Organization of clinics, camps: Types, Preparation, planning, conduct and evaluation
- Waste management in the center, clinics etc.

Home visit: Concept, Principles, Process, Techniques: Bag technique home visit, Qualities of Community Health Nurse

Unit-5 Job Description of Community health nursing personnel 15 Hours

Assisting individuals and groups to promote and maintain their health

Empowerment for self care of individuals, families and groups in

A. Assessment of self and family, Monitoring growth and development, Mile stones, Weight measurement, Social development, Temperature and Blood pressure monitoring, Menstrual cycle, Breast self examination and testicles, Warning Signs of various diseases

- Tests: Urine for sugar and albumin, blood sugar
- B.Seek health services for Routine checkup, Immunization Counseling, Diagnosis, Treatment, Follow up, Maintenance of health records for self and family
- Continue medical care and follow up in community for various diseases and disabilities
- E. Carryout therapeutic procedures as prescribed! Required for self and family
- F. Waste Management
- Collection and disposable of waste at home and community
- G. Sensitize and handle social issues affecting health and development for self and family
- Women Empowerment
- Women and child abuse.
- Abuse of elders, Female Foeticide, Commercial sex workers
- Food adulteration, Substance abuse, Utilize community resources for self and family Trauma services
- Old age homes, Orphanage, Homes for physically and mentally challenged individuals, Homes for destitute

UNIT 6 National Health & Family Welfare Programmes and the Role of Nurse 12 Hours

National ARI Programme ,Revised National Tuberculosis Control Programme (RNTCP) National Anti-Malaria Programme, National Filaria control Programme, National Guinea worm eradicationProgramme, National Leprosy Eradication Programme, National AIDS Control Programme,STD Contro Programme, National Programme for Control of Blindness Iodine Deficiency Disorder Programme ,Expanded Programme on Immunization

National Family Welfare Programme – RCH Programme

Historical Development, Organization, Administration, Research, Constraints
National Water Supply & Sanitation Programme, Minimum need programme, National Diabetics
Control Programme, Polio Eradication,: Pulse Polio Programme, National Cancer Control
Programme, Yaws eradication programme, National Nutritional Anemia Prophylaxis Programme
,20 Point Programme,ICDS Programme Mid-day Meal Applied Nutritional Programme, National
Mental Health Programme,Health Schemes ESI,CGHS,Health Insurance

UNIT 7 Health Agencies

5 Hours

International - WHO, UNFPA, UNDP, World Bank, FAQ, UNICEF, DANIDA, European Commission (BC), Red cross, USAID, UNESCO, Colombo Plan, ILO, CARE etc. National -Indian Red Cross, Indian Council for child welfare, Family Planning Association of India (FPAI), Tuberculosis Association India, Hindu Kusht Nivaran Sangh, Central Social Welfare Board, All India women's conference, Blind Association of India etc.
