## Portfolio

A portfolio is a grouping of financial assets such as stocks, bonds, cash equivalents as well as their mutual, exchange –traded and closed-fund counterparts.

His choice depends upon the risk-return characteristics of individual securities.

## Building a Portfolio

Step-1 : Use the Markowitz portfolio selection model to identify optimal combinations.

Step-2 : Consider borrowing and lending possibilities.

Step-3 : choose the final portfolio based on your preferences for return relative to risk

## PORTFOLIO SELECTION

Goal: finding the optimal portfolio

**OPTIMAL PORTFOLIO:** Portfolio that provides the highest return and lowest risk.

Method of portfolio selection: Markowitz model.

## Portfolio Selection

The proper goal of portfolio construction would be to generate a portfolio that provides the highest return and the lowest risk is called **Optimal portfolio**.

➤ The process of finding the optimal portfolio is described as **Portfolio selection**

## Efficient Set of Portfolio

The concept of efficient portfolio, let us consider various combinations of securities and designated them as portfolio 1 to n.

The risk of these portfolios may be estimated by measuring the standard deviation of portfolio returns.
