GALGOTIAS

Name of the Faculty: Ms.Monalisha Dash  
BSCHM/BHM

Program Name:

# Granolithic

- **Granolithic**- granite chips mixed with cement  
uses- (used for bathrooms counter)
- This heavy duty flooring is used for basement corridors, storerooms, stairways and laundry area.

A decorative background featuring several balloons in shades of green, blue, and purple, with yellow streamers and confetti scattered around them.

# Stone ( marble, granite, limestone)

- The natural stone are available in slab form, is usually cut in tiles from quarried blocks of the stone or rocks
- Floors made from marble & granite are expensive and hard on feet
- Provides beautiful flooring material that has a timeless, elegant quality
- They referred as **hard floors** because they offer no resilience, are cold underfoot and noisy in comparison to other types of floors

# slate

- This is used in store rooms, kitchens, back areas and laundry
- It is hard surface

# Ceramic tiles

- Ceramics tiles are natural product made from clay,
- Glazed ceramics tiles have a ceramic coating applied to the tile body, which gives the tile its colour and finish

Glazed tiles are used in kitchens and bathrooms

- This tiles is best known for its imperviousness to water and other soils.
- It is also resistance to chipping,scratching,heat and acid

# Resin

- Synthetic resin (polyester) mixed with appropriate hardner.
- Some marble chips are mixed to make it more attractive
- This type of flooring are heavy duty and hard surfaces.
- They are un affected by spillage of water, food, alcohol and most chemicals.
- Used in laundry, cold storage and back areas
- Instead of shiny surface they are use in kitchens, canteens , bathroom, corridor and laundries.
