METHOD OF TEACHING LECTURE 6

GALGOTIAS
UNIVERSITY

Project method
INTRODUCTION:

According to **Sir John Dewey** " What is to be taught should have a direct relationship with the actual happening in life", this central idea forms the core basis of project method.

DEFINITION:

Stevenson (1922). "A project is a problematic act carried to completion in its most natural setting".

Kilpatrick (1921). "A project is a whole- hearted purposeful activity proceeding in a social environment".

Ballard. H.G. (1936). "A project is a bit of real life that has been imported into school".

STEPS INVOLVED IN PROJECT METHOD:

1. Providing a situation
2. Choosing and purposing of the project
3. Planning of the project
4. Execution of the project
5. Evaluation of the project
6. Recording of the project

ADVANTAGES:

1. It arouses and maintains the interest of student

2. It gives the student freedom of thought and action

3. It establishes a definite, tangible, ascertainable goal and what progress is being made and when it is completed

CONTD…

4. This method allows growth through activity on the part of the learner

5. It develop a spirit of cooperation and community interest.

DISADVANTAGES:

- Wrong selection of topics
- Over consumption of time
- Availability and cost of materials
- When individual projects are overemphasized, there may be overdevelopment of individualism and under development of cooperation and group responsibility
